
BULLETIN # 136

Manitoba Drug Benefits and Manitoba Drug Interchangeability Formulary Amendments

The following amendments will take effect on
December 19, 2024 and March 19, 2025

The amended Manitoba Drug Benefits Formulary and Manitoba Drug Interchangeability Formulary will be available on the Manitoba Health website
<http://www.gov.mb.ca/health/mdbif> on the effective date of
December 19, 2024 and March 19, 2025

Bulletin 136 is currently available for download:

<https://www.gov.mb.ca/health/mdbif/docs/bulletins/bulletin136.pdf>

Please also refer to the psv/excel files* found on the Manitoba Health website under Notices here:

<https://www.gov.mb.ca/health/pharmacare/healthprofessionals.html>

*The psv/excel files contain the following information: DIN, PRODUCT NAME, UNIT PRICE (List Price + Allowable Markup) & LOWEST GENERIC PRICE (List Price + Allowable Markup).

Information on allowable markup can be found here:

https://www.gov.mb.ca/health/pharmacare/profdocs/csp_pdrc.pdf

Part 2 Additions

02539411 02539438 02539446	Jamp Amoxi Clav Suspension	amoxicillin/clavulanic acid	200/28.5 mg/ 5 mL 250/62.5 mg/ 5 mL 400/57 mg/ 5 mL	Oral Suspension	JPC
----------------------------------	----------------------------	-----------------------------	--	-----------------	-----

- (a) For the treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
- (b) For the treatment of patients with infections caused by organisms known to be resistant to alternative antibiotics (eg. Amoxicillin).

02526794 02526808 02526816	Vraylar	cariprazine	1.5 mg 3 mg 4.5 mg	Capsule	ABV
----------------------------------	----------------	-------------	--------------------------	---------	-----

For the treatment of schizophrenia.

Exception Drug Status Additions

02538679 02538687 02538695 02538709 02538717	Apo-Brivaracetam	brivaracetam	10 mg 25 mg 50 mg 75 mg 100 mg	Tablet	APX
02539292 02539306	Auro-Brivaracetam	brivaracetam	50 mg 100 mg	Tablet	AUP

For use as an adjunctive therapy in patients in the management of refractory partial-onset seizures (POS) in adult patients with epilepsy who are not satisfactorily controlled with conventional therapy and who meet all of the following criteria:

- a) are under the care of a physician experienced in the treatment of epilepsy,
- b) are currently receiving two or more antiepileptic drugs, and
- c) in whom all other antiepileptic drugs are ineffective or not appropriate

02480824 02480832 02480840	Cabometyx <i>(new indication)</i>	cabozantinib	20 mg 40 mg 60 mg	Tablet	IPL
----------------------------------	---	--------------	-------------------------	--------	-----

Advanced or Metastatic Renal Cell Carcinoma (RCC)

Cabozantinib in combination with nivolumab for the treatment of adult patients with advanced (not amendable to curative surgery or radiation therapy) or metastatic renal cell carcinoma (RCC) who have had no prior systemic therapy for metastatic disease.

02532549 02532557 02532565 02532573	Camzyos	mavacamten	2.5 mg 5 mg 10 mg 15 mg	Capsule	BMS
--	----------------	------------	----------------------------------	---------	-----

For the treatment of symptomatic obstructive hypertrophic cardiomyopathy (oHCM) of New York Heart Association (NYHA) Class II-III in adult patients if all the following criteria are met:

- Documented left ventricular ejection fraction (LVEF) greater than or equal to 55% at rest determined by echocardiography; **AND**
- Left ventricular (LV) wall thickness greater than or equal to 15 mm (or greater than or equal to 13 mm with a family history of hypertrophic cardiomyopathy [HCM]); **AND**
- Left ventricular outflow tract (LVOT) peak gradient greater than or equal to 50 mm Hg at rest, after Valsalva maneuver, or postexercise, as confirmed by echocardiography; **AND**
- Receiving beta-blocker or calcium channel blocker therapy and experiencing clinical deterioration in symptoms or echocardiography while receiving either of these treatments.
- Patient is under the care of a cardiologist.

Initial approval: 12 weeks

Discontinuation Criteria:

Mavacamten coverage will be discontinued if either of the following occur:

- The patient has a LVEF less than or equal to 30%; **OR**
- The patient receives septal reduction therapy (SRT).

Renewal approval, if discontinuation criteria are not met: 1 year

02547724	Cosentyx <i>(new din)</i>	secukinumab	150 mg/mL	Pre-filled syringe	NVT
----------	-------------------------------------	-------------	-----------	--------------------	-----

See Bulletin #89 and #98 for prescribing criteria:

<https://www.gov.mb.ca/health/mdbif/docs/bulletins/bulletin89.pdf>

<https://www.gov.mb.ca/health/mdbif/docs/bulletins/bulletin98.pdf>

02533294	Empaveli	pegcetacoplan	1080 mg/20 mL	Injection	SOB
----------	-----------------	---------------	---------------	-----------	-----

For the treatment of adult patients with Paroxysmal Nocturnal Hemoglobinuria (PNH) who have an inadequate response to, or are intolerant of, a C5 inhibitor only if the following criteria are met:

Initiation Criteria:

- Patient has qualified for EDS approval for C5 inhibitor treatment (e.g., eculizumab or ravulizumab); AND
- Patient is experiencing at least ONE of the following:
 - Persistent anemia with hemoglobin levels less than 105 g/L (10.5 g/dL), despite six months of treatment with a stable dose of a C5 inhibitor, and where causes other than extravascular hemolysis have been excluded; OR
 - Intolerable adverse events from C5 inhibitor treatment.

Initial approval: 6 months

Renewal Criteria:

- After the initial approval period, a patient may receive approval for further coverage of pegcetacoplan where:
 - There has been relief in the PNH symptoms that qualified the patient for their initial C5 inhibitor coverage approval; AND
 - There is a demonstrated clinical improvement in the patient, or stabilization of the patient's condition, while receiving treatment with pegcetacoplan; AND
 - The patient and treating physician have been adequately adherent to treatment and to measures, including monitoring requirements, taken to evaluate the effectiveness of the therapy.

Requests for renewal must be accompanied by current confirmation of granulocyte and monocyte clone size (by flow cytometry).

Renewal approval: 1 year

Exclusion Criteria (for initial and renewal requests):

- Patients meeting ANY of the following criteria will not be eligible for pegcetacoplan coverage:
 - Receiving concurrent treatment with other complement inhibitors (e.g., eculizumab or ravulizumab) except in the first 4 weeks of pegcetacoplan treatment; OR
 - Granulocyte and monocyte clone size both below 10%; OR
 - Presence of aplastic anemia with two or more of the following: neutrophil count below $0.5 \times 10^9/L$, platelet count below $20 \times 10^9/L$, reticulocytes below $25 \times 10^9/L$, or severe bone marrow hypocellularity; OR
 - Presence of another life-threatening or severe disease where the long-term prognosis is unlikely to be influenced by therapy (e.g., acute myeloid leukemia or high-risk myelodysplastic syndrome); OR
 - Presence of another medical condition that might reasonably be expected to compromise a response to pegcetacoplan therapy.

Requests for coverage must be made by or in consultation with a nephrologist or hematologist with experience managing PNH.

02472104 02472112	Lonsurf <i>(new indication)</i>	tipiracil/trifluridine	6.14/15 mg 8.19/20 m	Tablet	TAI
----------------------	---	------------------------	-------------------------	--------	-----

Metastatic Colorectal Cancer

In combination with bevacizumab, for the treatment of adult patients with metastatic colorectal cancer who have been previously treated with, or are not candidates for, available therapies including fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapies, anti-VEGF biological agents, and, if RAS wild-type, anti-EGFR agents.

02539861	Omvoh	mirikizumab	20 mg/mL	Solution <i>intravenous</i>	LIL
02539853	Omvoh	mirikizumab	100 mg/mL	Injection <i>prefilled syringe</i>	LIL
02539845	Omvoh	mirikizumab	100 mg/mL	Injection <i>prefilled pen</i>	LIL

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

02525755	Oxlumo	lumasiran	94.5 mg/0.5 mL	Injection	ANB
----------	---------------	-----------	----------------	-----------	-----

For the treatment of primary hyperoxaluria type 1 (PH1) to lower urinary oxalate levels in pediatric and adult patients if **all** the following criteria are met:

Initiation Criteria:

- Patient must have a genetically confirmed diagnosis of PH1; **AND**
- Patient must be unable to normalize oxalate excretion (while staying compliant with standard of care therapy, including vitamin B6 for a duration of 3 to 6 months), based on one of the following levels:
 - 24-hour urine oxalate (level must be at least 1.5 times the upper limit of normal [ULN]), for patients in whom urinary oxalate can be measured; **OR**
 - Spot urine oxalate:creatinine ratio, for patients who are not continent; **OR**
 - Plasma oxalate, for patients with end-stage kidney disease (ESKD) or who are on dialysis. Levels must be measured pre-dialysis in applicable patients;

AND

- Lumasiran is being initially prescribed by a nephrologist or metabolic diseases specialist with experience in the diagnosis and management of PH1.

Initial approval duration: 1 year

Discontinuation Criteria:

- Lumasiran coverage will be discontinued if **any** of the following occur:
 - The patient has received a liver transplant (with or without a kidney transplant); **AND/OR**
 - There is evidence of no response, or loss of response, to lumasiran treatment.

Response is defined as:

- For patients in whom urinary oxalate can be measured: Lowering 24-hour urine oxalate to less than 1.5 times the ULN; **OR**
- For patients who are not continent: 30% reduction in spot urine oxalate:creatinine ratio compared to baseline; **OR**
- For patients with ESKD or who are on dialysis: 15% reduction in plasma oxalate level compared to baseline. Levels must be measured pre-dialysis in applicable patients.

Subsequent prescribing may occur through a pediatrician, nephrologist or metabolic diseases specialist.

Renewal approval duration (if discontinuation criteria are not met): 1 year

02533979	Qulipa (new indication)	atogepant	10 mg 30 mg 60 mg	Tablet	ABV
02533987					
02533995					

For the prevention of migraine in patients who have a confirmed diagnosis of either:

1. Episodic migraine: headaches for less than 15 days per month for more than 3 months of which at least 4 days per month are with migraine; **OR**
2. Chronic migraine: headaches for at least 15 days per month for more than 3 months of which at least 8 days per month are with migraine.

Initiation criteria:

- The patient must have experienced an inadequate response¹, intolerance, or contraindication to at least two oral prophylactic migraine medications² of different classes; AND
- The patient must be under the care of a physician who has appropriate experience in the management of migraine headaches; AND
- The physician must provide the number of headache and migraine days per month at the time of initial request for reimbursement.

Initial approval duration: 6 months

Initial Renewal criteria:

- Reduction of at least 50% in the average number of migraine days per month compared with baseline.

Renewal duration: 6 months

Subsequent Renewal criteria:

- Maintenance of 50% reduction in the average number of migraine days per month from baseline.

¹Inadequate response to oral prophylactic therapies is defined as less than a 30% reduction in frequency of headache days to an adequate dose and duration of at least two prophylactic medications, which must be of a different class.

²Oral prophylactic medication alternatives include:

- beta blockers
- tricyclic antidepressants
- verapamil or flunarizine
- sodium valproate or divalproex sodium
- topiramate
- gabapentin

Combined use with other calcitonin gene-related peptide (CGRP) inhibitors will not be reimbursed.

02532409	Reddy-Everolimus	everolimus	2.5 mg 5 mg 10 mg	Tablet	DRL
02532417					
02532433					

For the treatment of:

- Advanced Breast Cancer;
- Advanced or Metastatic Pancreatic Neuroendocrine Tumors (pNET);
- Advanced Metastatic Renal Cell Carcinoma (RCC);
- For treatment of unresectable, locally advanced or metastatic, well-differentiated non-functional neuroendocrine tumours (NETs) of gastrointestinal or lung origin (GIL) in adults with documented radiological disease progression within six months and with a good performance status. Treatment should continue until confirmed disease progression or unacceptable toxicity.

02537044	Verquvo	vericiguat	2.5 mg 5 mg 10 mg	Tablet	BAY
02537052					
02537060					

For the treatment of symptomatic chronic heart failure (HF) as an adjunct to standard-of-care therapy in adult patients with reduced ejection fraction who are stabilized after a recent HF decompensation event, if all the following clinical criteria are met:

- Left ventricular ejection fraction (LVEF) less than 45%; and
- New York Heart Association (NYHA) class II to IV symptoms; and
- Recent HF decompensation event requiring hospitalization within the previous 6 months and/or intravenous diuretic treatment for HF (without hospitalization) within the previous 3 months; and
- Vericiguat is used in combination with standard-of-care HF therapy, which includes one medication from each of the following categories (unless there is a contraindication or intolerance):
 - Angiotensin-converting enzyme inhibitor (ACEI) or angiotensin receptor blocker (ARB) or angiotensin receptor-neprilysin inhibitor (ARNI); and
 - Beta blocker; and

- Mineralocorticoid receptor antagonist (MRA); and
- Sodium-glucose cotransporter-2 (SGLT2) inhibitor

Initiation and up-titration should be conducted by or under the direct guidance of a physician experienced with treatment of HF to respect the referral process.

02528908	Welireg	belzutifan	40 mg	Tablet	MFX
----------	----------------	------------	-------	--------	-----

Treatment of adult patients with von Hippel-Lindau (vHL) disease who require therapy for associated non-metastatic renal cell carcinoma (RCC), Central Nervous System (CNS) hemangioblastomas, or pancreatic neuroendocrine tumors (pNET), not requiring immediate surgery.

02371065 02457113	Zytiga <i>(updated criteria)</i>	abiraterone acetate	250 mg 500 mg	Tablets	JAN

02477114 02533251	Reddy-Abiraterone <i>(updated criteria)</i>	abiraterone acetate	250 mg 500 mg	Tablets	DRL
02486393 02521644	Sandoz Abiraterone <i>(updated criteria)</i>	abiraterone acetate	250 mg 500 mg	Tablets	SDZ

For patients:

- With non-metastatic castration-sensitive prostate cancer (nmCSPC) **AND**
- Who are at very high risk* of developing metastases **AND**
- With good performance status

*Defined as:

- node positive disease **OR**
- node negative with 2 of the following:

- i) Clinical tumor stage T3 or T4
- ii) Gleason sum score 8 to 10
- iii) PSA $\geq 40 \mu\text{g/L}$

- Treatment with abiraterone and prednisone should be given with androgen deprivation therapy.
- Treatment should continue until unacceptable toxicity or radiographic progression, up to a maximum of 2 years of therapy.
