

MANITOBA DRUG BENEFITS FORMULARY

Effective: December 19, 2024

PART 1

Any one of the following:

- AA-AMILZIDE – 5/50 MG TABLETS
- AA-ATENIDONE – 50/25 AND 100/25 MG TABLETS
- AA-CLOZAPINE – 25 AND 100 MG TABLETS
- AA-DILTIAZ – 30 AND 60 MG TABLETS
- AA-FENO-MICRO – 67 AND 200 MG CAPSULES
- AA-FENO-SUPER – 100 AND 160 MG TABLETS
- AA-LEVOCARB CR – 100/25 AND 200/50 MG TABLETS
- AA-MEDROXY – 2.5, 5, 10 AND 100 MG TABLETS
- AA-THEO LA – 100, 200 AND 300 MG TABLETS
- ABILIFY – 2, 5, 10, 15, 20 AND 30 MG TABLETS
- ACCEL-HYOSCINE – 10 MG TABLETS
- ACCEL-ONDANSETRON – 4 AND 8 MG TABLETS
- ACCU-CHEK AVIVA TEST STRIPS
- ACCU-CHEK COMPACT TEST STRIPS
- ACCU-CHEK FASTCLIX LANCETS
- ACCU-CHEK GUIDE BLOOD GLUCOSE TEST STRIPS
- ACCU-CHEK MOBILE CASSETTE
- ACCU-CHEK MULTICLIX LANCETS
- ACCUTANE – 10 AND 40 MG TABLETS
- ACETAZOLAMIDE (AA PHARMA) – 250 MG TABLETS
- ACH-ALENDRONATE – 10 AND 70 MG TABLETS
- ACH-AMLODIPINE – 2.5, 5 AND 10 MG TABLETS
- ACH-ANASTROZOLE – 1 MG TABLETS
- ACH-APIXABAN – 2.5 AND 5 MG TABLETS
- ACH-ATORVASTATIN CALCIUM – 10, 20, 40 AND 80 MG TABLETS
- ACH-BICALUTAMIDE – 50 MG TABLETS TABLETS
- ACH-CANDESARTAN – 4, 8, 16 AND 32 MG TABLETS
- ACH-CAPECITABINE – 150 AND 500 MG
- ACH-DONEPEZIL – 5 AND 10 MG TABLETS
- ACH-ESCITALOPRAM – 10 AND 20 MG TABLETS
- ACH-EZETIMIBE – 10 MG TABLETS
- ACH-FLUOXETINE – 10 AND 20 MG CAPSULES
- ACH-LETROZOLE – 2.5 MG TABLETS
- ACH-FLUOXETINE – 10 AND 20 MG CAPSULES
- ACH-LETROZOLE – 2.5 MG TABLETS
- ACH-MYCOPHENOLATE – 250 MG CAPSULE AND 500 MG TABLETS
- ACH-METHOTREXATE – 2.5 MG TABLETS
- ACH-OLMESARTAN – 20 AND 40 MG TABLETS
- ACH-OLMESARTAN HCTZ – 20/12.5, 40/12.5 AND 40/25 MG TABLETS
- ACH-OLMESARTAN – 20 AND 40 MG TABLETS
- ACH-OLMESARTAN HCTZ – 20/12.5, 40/12.5 AND 40/25 MG TABLETS
- ACH-PRAVASTATIN – 10, 20 AND 40 MG TABLETS
- ACH-PREGABALIN – 25, 50, 75, 150 AND 300 MG CAPSULES
- ACH-QUETIAPINE FUMARATE XR – 50, 150, 200, 300 AND 400 MG EXTENDED RELEASE TABLETS

- ACH-ROSUVASTATIN – 5, 10, 20 AND 40 MG TABLETS
- ACH-SOLIFENACIN – 5 AND 10 MG TABLETS
- ACH-TELMISARTAN HCTZ – 80/12.5 AND 80/25 MG TABLETS
- ACH-TOPIRAMATE – 25, 100 AND 200 MG TABLETS
- ACT AMLODIPINE – 5 AND 10 MG TABLETS
- ACT AMPHETAMINE XR – 5, 10, 15, 20, 25 AND 30 MG CAPSULES
- ACT DEXTROAMPHETAMINE SR – 10 AND 15 MG CAPSULES
- ACT DILTIAZEM CD – 120, 180 AND 300 MG CAPSULES
- ACT DORZOTIMOLOL – 2%/0.5% OPHTHALMIC SOLUTION
- ACT ENALAPRIL – 2.5, 5, 10 AND 20 MG TABLETS
- ACT EXEMESTANE – 25 MG TABLETS
- ACT FAMCICLOVIR – 125, 250 AND 500 MG TABLETS
- ACT FLUVOXAMINE – 50 AND 100 MG TABLETS
- ACTIKERALL – 0.5%/10% TOPICAL SOLUTION
- ACT LATANOPROST/TIMOLOL – 50 MCG/5 MG/ML OPHTHALMIC SOLUTION
- ACT LOVASTATIN – 20 AND 40 MG TABLETS
- ACT METHYLPHENIDATE ER – 18, 27, 36 AND 54 MG TABLETS
- ACTONEL – 35 MG TABLETS
- ACT QUETIAPINE – 25, 100, 200 AND 300 MG TABLETS
- ACT RALOXIFENE – 60 MG TABLETS
- ACT TERBINAFINE – 250 MG TABLETS
- ACT VENLAFAXINE XR – 37.5, 75 AND 150 MG CAPSULES
- ACULAR – 0.5% OPHTHALMIC SOLUTION
- ACUVAIL – 0.45% OPHTHALMIC SOLUTION
- ADALAT XL – 30 MG EXTENDED RELEASE TABLETS
- ADDERALL XR – 5, 10, 15, 20, 25 AND 30 MG CAPSULES
- ADMELOG – 100 U/ML CARTRIDGE AND VIAL
- ADMELOG SOLOSTAR – 100 U/ML
- ADVAIR 125 – 125/25 MCG METERED DOSE INHALER
- ADVAIR 250 – 250/25 MCG METERED DOSE INHALER
- ADVAIR DISKUS – 50/100, 50/250 AND 50/500 MCG POWDER FOR INHALATION
- AERMONY RESPICLICK – 55, 113, 232 MCG METERED DOSE INHALER
- AEROCHAMBER
- AEROCHAMBER2GO
- AEROCHAMBER WITH MASK
- AEROSAL CLOUD ENHANCER
- AG-ALENDRONATE – 70 MG TABLETS
- AG-AMOXICILLIN – 500 MG CAPSULES
- AG-ATENOLOL – 25, 50 AND 100 MG TABLETS
- AG-ATORVASTATIN – 10, 20, 40 AND 80 MG TABLETS
- AG-CELECOXIB – 100 AND 200 MG CAPSULES
- AG-CITALOPRAM TABLETS – 30 MG TABLETS
- AG-DONEPEZIL – 5 AND 10 MG TABLETS
- AG-DULOXETINE – 30 AND 60 MG CAPSULES
- AG-EZETIMIBE – 10 MG TABLETS
- AG-FLUOXETINE – 10 AND 20 MG CAPSULES
- AG-METOPROLOL-L – 50 AND 100 MG TABLETS
- AG-OLANZAPINE FC – 2.5, 5 AND 10 MG TABLETS
- AG-PANTOPRAZOLE SODIUM – 40 MG TABLETS
- AG PAROXETINE – 10, 20 AND 30 MG TABLETS
- AG PERINDOPRIL – 2, 4 AND 8 MG TABLETS
- AG-PRAVASTATIN – 10, 20 AND 40 MG TABLETS

- AG-PREGABALIN – 25, 50, 75, 150 AND 300 MG CAPSULES
- AG-QUETIAPINE – 25 MG TABLETS
- AG-RAMIPRIL – 2.5, 5 AND 10 MG CAPSULES
- AG-SERTRALINE – 25, 50 AND 100 MG CAPSULES
- AG-SIMVASTATIN – 5, 10, 20, 40 AND 80 MG TABLETS
- AG-TOPIRAMATE – 25 AND 100 MG TABLETS
- AG-URSODIOL – 250 AND 500 MG TABLETS
- AG-ZOPICLONE – 5 AND 7.5 MG TABLETS
- AIROMIR – 100 MCG/DOSE METERED DOSE INHALER TO A MAXIMUM OF 4,400 DOSES PER BENEFIT YEAR
- ALCON ATROPINE – 1% OPHTHALMIC SOLUTION
- ALDACTONE – 25 AND 100 MG TABLETS TABLETS
- ALENDRONATE (SANIS) – 70 MG TABLETS
- ALENDRONATE (SIVEM) – 70 MG TABLETS
- ALFUZOSIN (SANIS) – 10 MG TABLETS
- ALFUZOSIN (SIVEM) – 10 MG TABLETS
- ALKERAN – 2 MG TABLETS
- ALKERAN – 50 MG INJECTION
- ALLERGY VACCINES
- ALLERJECT – 0.3 MG/0.3 ML AND 0.15 MG/0.15 ML INJECTION
- ALPHAGAN – OPHTHALMIC SOLUTION 0.2%
- ALTACE – 1.25, 2.5, 5, 10 AND 15 MG TABLETS
- ALVESCO – 100 AND 200 MCG INHALER – TO A MAXIMUM OF 4,400 DOSES PER BENEFIT YEAR
- AMIODARONE (SANIS) – 200 MG TABLETS
- AMIODARONE (SIVEM) – 200 MG TABLETS
- AMLODIPINE (SANIS) – 2.5, 5 AND 10 MG TABLETS
- AMLODIPINE (SIVEM) – 2.5, 5 AND 10 MG TABLETS
- AMOXICILLIN CAPSULES BP (SANIS) – 250 AND 500 MG CAPSULES
- AMOXICILLIN (SANIS) – 250 MG/5 ML ORAL SUSPENSION
- AMOXICILLIN (SIVEM) – 500 MG CAPSULES AND 250 MG/5 ML ORAL SUSPENSION
- ANAFRANIL – 10, 25 AND 50 MG TABLETS
- ANANDRON – 50 MG TABLETS
- ANASTROZOLE (SANIS) – 1 MG TABLETS
- ANASTROZOLE (SIVEM) – 1 MG TABLETS
- ANDROCUR – 50 MG TABLETS
- ANORO ELLIPTA – 62.5/25 MCG POWDER FOR INHALATION
- ANTISTATIC COMPACT SPACE CHAMBER PLUS
- APIDRA – 100 IU/ML INJECTION
- APIXABAN (SIVEM) - 2.5 AND 5 MG TABLETS
- APO-ACEBUTOLOL – 100, 200 AND 400 MG TABLETS
- APO-ACYCLOVIR OINTEMNT – 5% OINTMENT
- APO-ACYCLOVIR – 200, 400 AND 800 MG TABLETS
- APO-ALENDRONATE – 10 AND 70 MG TABLETS
- APO-ALFUZOSIN – 10 MG TABLETS
- APO-ALLOPURINOL TABLETS – 100, 200 AND 300 MG TABLETS
- APO-ALLOPURINOL – 100, 200 AND 300 MG TABLETS
- APO-ALPRAZ – 0.25, 0.5, 1 AND 2 MG TABLETS
- APO-AMIODARONE TABLETS – 200 MG TABLETS
- APO-AMITRIPTYLINE – 10, 25, 50 AND 75 MG TABLETS
- APO-AMLODIPINE – 5 AND 10 MG TABLETS
- APO-AMOXI CAPSULES AND SUSPENSION
- APO-AMPHETAMINE XR – 5, 10, 15, 20, 25 AND 30 MG CAPSULES
- APO-ANASTROZOLE – 1 MG TABLETS

- APO-APIXABAN – 2.5 AND 5 MG TABLETS
- APO-ARIPIPIRAZOLE – 2, 5, 10, 15, 20 AND 30 MG TABLETS
- APO-ATENOL TAB 50MG – 50 AND 100 MG TABLETS
- APO-ATORVASTATIN – 10, 20, 40 AND 80 MG TABLETS
- APO-AZATHIOPRINE – 50 MG TABLETS
- APO-BACLOFEN – 10 AND 20 MG TABLETS
- APO-BECLOMETHASONE NASAL SPRAY – 0.05% NASAL SPRAY
- APO-BISOPROLOL – 5 AND 10 MG TABLETS
- APO-BRIMONIDINE-TIMOP – 0.2/0.5 % OPHTHALMIC SOLUTION
- APO-BROMAZEPAM – 3 AND 6 MG TABLETS
- APO-BUSPIRONE TABLETS
- APO-CANDESARTAN TABLETS – 4, 8 16 AND 32 MG TABLETS
- APO-CAPTO – 12.5, 25, 50 AND 100 MG TABLETS
- APO-CARVEDILOL – 3.125, 6.25, 12.5 AND 25 MG TABLETS
- APO-CEFADROXIL – 500 MG CAPSULES
- APO-CEFADROXIL – 500 MG CAPSULES
- APO-CELECOXIB – 100 AND 200 MG CAPSULES
- APO-CEPHALEX – 250 AND 500 MG TABLETS
- APO-CHLORTHALIDONE – 50 MG TABLETS
- APO-CILAZAPRIL – 2.5 AND 5 MG TABLETS
- APO-CILAZAPRIL/HCTZ – 5 MG/12.5 MG TABLETS
- APO-CITALOPRAM – 20 AND 40 MG TABLETS
- APO-CLOBAZAM – 10 MG TABLETS
- APO-CLOMIPRAMINE – 10, 25 AND 50 MG TABLETS
- APO-CLONAZEPAM – 0.5 AND 2 MG TABLETS
- APO-CLOPIDOGREL – 75 MG TABLETS
- APO-DAPAGLIFLOZIN -5 AND 10MG TABLETS
- APO-DAPAGLIFLOZIN-METFORMIN –5MG/850MG AND 5MG/1000MG TABLETS
- APO-DEXAMETHASONE – 0.5 AND 4 MG TABLETS
- APO-DICLO – 25 AND 50 MG ENTERIC COATED TABLETS
- APO-DICLO SR – 75 AND 100 MG SLOW RELEASE TABLETS
- APO-DICLOFENAC – 0.1% OPHTHALMIC SOLUTION
- APO-DILTIAZ CD CAPSULES – 120, 180, 240 AND 300 MG CONTROLLED DELIVERY CAPSULES
- APO-DIVALPROEX – 125 MG, 250 MG, 500 MG ENTERIC COATED TABLETS
- APO-DOMPERIDONE – 10 MG TABLETS
- APO-DONEPEZIL – 5 AND 10 MG TABLETS
- APO-DORZO-TIMOP – 20 MG/5 MG/ML OPHTHALMIC DROPS
- APO-DOXAZOSIN – 1 MG, 2 MG AND 4 MG TABLETS
- APO-DOXY TABLETS AND CAPSULES
- APO-DOXYLAMINE/B6 – 10/10 MG TABLETS
- APO-DULOXETINE – 30 AND 60 MG CAPSULES
- APO-ENALAPRIL – 2.5, 5, 10 AND 20 MG TABLETS
- APO-ESCITALOPRAM – 10 AND 20 MG TABLETS
- APO-ESOMEPRAZOLE – 40 MG TABLETS
- APO-EZETIMIBE – 10 MG TABLETS
- APO-FAMCICLOVIR – 125, 250 AND 500 MG TABLETS
- APO-FELODIPINE – 2.5, 5 AND 10 MG TABLETS
- APO-FLECAINIDE – 50 AND 100 MG TABLETS
- APO-FLUOXETINE – 10 AND 20 MG CAPSULES
- APO-FLUTICASONE – 50 MCG NASAL SPRAY
- APO-FLUTICASONE HFA – 125 AND 250 MCG METERED DOSE INHALER
- APO-FLUVOXAMINE – 50 AND 100 MG TABLETS
- APO-FOSINOPRIL – 10 AND 20 MG TABLETS

- APO-FUROSEMIDE – 20, 40 AND 80 MG TABLETS
- APO-GABAPENTIN – 100, 300 AND 400 MG CAPSULES AND 600 MG TABLETS
- APO-GLICLAZIDE – 80 MG TABLETS
- APO-GLICLAZIDE MR – 30 AND 60 MG TABLETS
- APO-GLYBURIDE – 2.5 AND 5 MG TABLETS
- APO-GRANISETRON – 1 MG TABLET
- APO-HYDRALAZINE – 10, 25 AND 50 MG TABLETS
- APO-HYDROCHLORTHIAZIDE – 12.5, 25 AND 50 MG TABLETS
- APO-HYDROMORPHONE – 1, 2, 4 AND 8 MG TABLETS
- APO-HYDROXYQUINE – 200 MG TABLETS
- APO-HYDROXYUREA – 500 MG CAPSULES
- APO-IBUPROFEN – 600 MG TABLETS
- APO-INDAPAMIDE – 1.25 AND 2.5 MG TABLETS
- APO-IPRAVENT – 250 MCG/ML INHALATION SOLUTION TO A MAXIMUM OF 4,400 DOSES PER BENEFIT YEAR
- APO-KETOCONAZOLE – 200 MG TABLETS
- APO-LABETALOL – 100 AND 200 MG TABLETS
- APO-LAMOTRIGINE – 25, 100 AND 150 MG TABLETS
- APO-LANSOPRAZOLE – 15 AND 30 MG TABLETS
- APO-LATANOPROST – 0.005% OPHTHALMIC SOLUTION
- APO-LETROZOLE – 2.5 MG TABLETS
- APO-LEVETIRACETAM – 250, 500 AND 750 MG TABLETS
- APO-LEVOCARB TABLETS – 100/10, 100/25 AND 250/25 MG TABLETS
- APO-LISINAPRIL – 5, 10 AND 20 MG TABLETS
- APO-LITHIUM CARBONATE – 150 AND 300 MG CAPSULES AND 300 MG TABLETS
- APO-LORAZEPAM – 0.5, 1 AND 2 MG TABLETS
- APO-LOSARTAN – 25, 50 AND 100 MG TABLETS
- APO-MELOXICAM – 7.5 AND 15 MG TABLETS
- APO-METHOTREXATE – 2.5 MG TABLETS
- APO-METHYLPHENIDATE – 5, 10 AND 20 MG TABLETS AND 20 MG SUSTAINED RELEASE TABLETS
- APO-METHYLPHENIDATE ER – 18, 27, 36 AND 54 MG TABLETS
- APO-METOPROLOL – 25, 50 AND 100 MG TABLETS
- APO-METOPROLOL (TYPE L) – 50 AND 100 MG TABLETS
- APO-METRONIDAZOLE – 250 MG TABLETS
- APO-MIDODRINE – 2.5 AND 5 MG TABLETS
- APO-MIRTAZAPINE – 15, 30 AND 45 MG TABLETS
- APO-MOMETASONE – 50 MCG NASAL SPRAY
- APO-MYCOPHENOLATE – 250 MG CAPSULES AND 500 MG TABLETS
- APO-NADOLOL – 40, 80 AND 160 MG TABLETS
- APO-NALTREXONE – 50 MG TABLETS
- APO-NAPROXEN – 250, 375 AND 500 MG TABLETS
- APO-OLANZAPINE – 2.5, 5, 7.5, 10 AND 15 MG TABLETS
- APO-OLANZAPINE ODT – 5, 10 AND 15 MG TABLETS
- APO-OLMESARTAN – 20 AND 40 MG TABLETS
- APO-OLMESARTAN HCTZ – 20/12.5, 40/12.5 AND 40/25 MG TABLETS
- APO-OMEPRAZOLE – 20 MG CAPSULES
- APO-ONDANSETRON – 4 AND 8 MG TABLETS AND 4MG/5ML ORAL SOLUTION
- APO-OXAZEPAM – 10, 15 AND 30 MG TABLETS
- APO-OXYBUTYNIN – 5 MG TABLETS
- APO-OXYCODONE/ACET – 5 MG/325 MG TABLETS
- APO-PANTOPRAZOLE – 40 MG TABLETS
- APO-PAROXETINE – 10, 20 AND 30 MG TABLETS

- APO-PERINDOPRIL – 2, 4 AND 8 MG TABLETS
- APO-PERINDOPRIL-INDAPAMIDE – 4/1.25 AND 8/2.5 MG TABLETS
- APO-PINDOL 15 MG TABLETS
- APO-PIROXICAM 10 AND 20 MG CAPSULES
- APO-PRAVASTATIN – 10, 20 AND 40 MG TABLETS
- APO-PRAZO – 1, 2, AND 5MG TABLETS
- APO-PREDNISONE – 5 AND 50 MG TABLETS
- APO-PREGABALIN – 25, 50, 75, 150, AND 300 MG CAPSULES
- APO-PROPAFENONE – 150 AND 300 MG TABLETS
- APO-QUETIAPINE FUMARATE – 25, 100, 200 AND 300 MG TABLETS
- APO-QUETIAPINE FUMARATE – 25, 100, 200 AND 300 MG TABLETS
- APO-QUETIAPINE XR – 50, 150, 200, 300 AND 400 MG TABLETS
- APO-QUINAPRIL – 5, 10, 20 AND 40 MG TABLETS
- APO-QUINAPRIL/HCTZ – 10/12.5 MG, 20/12.5 MG AND 20/25 MG TABLETS
- APO-QUININE – 200 MG CAPSULES
- APO-RALOXIFENE – 60 MG TABLETS
- APO-RAMIPRIL – 1.25, 2.5, 5, 10 AND 15 MG CAPSULES
- APO-RANITIDINE – 15 MG/ML ORAL SOLUTION
- APO-RANITIDINE – 150 AND 300 MG TABLETS
- APO-RISEDRONATE – 35 MG TABLETS
- APO-RISPERIDONE – 0.25, 0.5, 1, 2, 3 AND 4 MG TABLETS
- APO-RIVAROXABAN – 2.5, 10, 15, AND 20MG TABLETS
- APO-ROSUVASTATIN – 5, 10, 20 AND 40 MG TABLETS
- APO-SALBUTAMOL HFA – 100 MCG/DOSE METERED DOSE INHALER TO A MAXIMUM OF 4,400 DOSES PER BENEFIT YEAR
- APO-SERTRALINE – 25 MG, 50 MG AND 100 MG CAPSULES
- APO-SIMVASTATIN – 5, 10, 20, 40 AND 80 MG TABLETS
- APO-SOTALOL TABLETS – 80 AND 160M G TABLETS
- APO-SUCRALFATE – 1 G TABLETS
- APO-TAMOX – 10 AND 20 MG TABLETS
- APO-TAMSULOSIN CR – 0.4 MG TABLET
- APO-TERAZOSIN – 1, 2, 5 AND 10 MG TABLETS
- APO-TERBINAFINE – 250 MG TABLETS
- APO-TETRABENAZINE – 25 MG TABLETS
- APO-TIMOP – 0.25 AND 0.5% OPHTHALMIC SOLUTION
- APO-TOPIRAMATE – 25, 100 AND 200 MG TABLETS
- APO-TRAVOPROST-TIMOP PQ – 0.5/0.004% OPHTHALMIC SOLUTION
- APO-TRAZODONE – 50, 100 AND 150 MG TABLETS
- APO-TRIAMCINOLONE AQ – 55 MCG METERED DOSE
- APO-TRIAZIDE – 50/25 MG TABLETS
- APO-TRIMEBUTINE – 100 AND 200 MG TABLETS
- APO-VALACYCLOVIR – 500 MG TABLETS
- APO-VALPROIC – 250 MG CAPSULES
- APO-VALPROIC – 250 MG/5 ML SYRUP
- APO-VARENICLINE – 0.5 AND 1 MG CAPSULES – TO A MAXIMUM OF 165 TABLETS PER BENEFIT YEAR
- APO-VARENICLINE – 0.5 AND 1 MG STARTER KIT
- APO-VENLAFAXINE XR – 37.5, 75 AND 150 MG TABLETS
- APO-VERAP – 80 AND 120 MG, TABLETS
- APO-VERAP SR – 120, 180 AND 240 MG SUSTAINED RELEASE TABLETS
- APO-WARFARIN – 1, 2, 2.5, 3, 4, 5 AND 10 MG TABLETS
- APO-ZOPICLONE – 5 AND 7.5 MG TABLETS
- ARAZLO – 0.045 % TOPICAL LOTION
- ARICEPT – 5 AND 10 MG TABLETS
- ARIMIDEX TABLETS – 1 MG TABLETS
- ARIPIPRAZOLE (SANIS) – 2, 5, 10, 15, 20 AND 30 MG TABLETS
- ARIPIPRAZOLE (SIVEM) – 2, 5, 10, 15, 20, AND 30MG TABLETS
- ARISTOCORT C – 0.5% CREAM
- ARISTOCORT R – 1% CREAM AND OINTMENT

- ARNUITY ELLIPTA – 100 MCG AND 200 MCG METERED DOSE INHALER
- AROMASIN – 25 MG TABLETS
- ASMANEX TWISTHALER – 200 AND 400 MCG INHALER
- ATACAND – 4, 8, 16 AND 32 MG TABLETS
- ATACAND PLUS – 16 MG/12.5 MG TABLETS
- ATARAX – 10 MG/ 5 ML SYRUP
- ATECTURA BREEZHALER – 150/80, 150/160 AND 150/320 MCG INHALATION CAPSULE
- ATENOLOL (SANIS) – 50 AND 100 MG TABLETS
- ATENOLOL (SIVEM) – 25, 50 AND 100 MG TABLETS
- ATHENA-ONDANSETRON ODT – 4 AND 8 MG TABLETS
- ATIVAN ORAL AND SUBLINGUAL TABLETS
- ATORVASTATIN (PMS) – 10, 20 AND 40 TABLETS
- ATORVASTATIN (RIVA) – 10, 20, 40 AND 80 MG TABLETS
- ATORVASTATIN (SANIS) – 10, 20, 40 AND 80 MG TABLETS
- ATORVASTATIN (SIVEM) – 10, 20, 40 AND 80 MG TABLETS
- ATROPINE SULFATE 1% SOLUTION
- ATROVENT HFA – 20 MCG METERED DOSE INHALER TO A MAXIMUM OF 4,400 DOSES PER BENEFIT YEAR
- AUTOSOFT – 6, 9 OR 13 MM CANNULA AND 23”/60 OR 43”/110 CM TUBING INFUSION SET
- AURO-ALENDRONATE – 10 AND 70 MG TABLETS
- AURO-ALFUZOSIN – 10 MG TABLETS
- AURO-AMLODIPINE – 5 AND 10 MG TABLETS
- AURO-AMOXICILLIN – 250 AND 500 MG CAPSULES
- AURO-AMOXICILLIN – 250MG/5ML SUSPENSION
- AURO-APIXABAN – 2.5 AND 5 MG TABLETS
- AURO-ARIPIRAZOLE – 2, 5, 10, 15, 20 AND 30 MG TABLETS
- AURO -ATORVASTATIN – 10, 20, 40 AND 80 MG TABLETS
- AURO-BETAHISTINE – 8, 16 AND 24 MG TABLETS
- AURO-BUSPIRONE – 10 MG TABLETS
- AURO-CANDESARTAN – 4, 8, 16 AND 32 MG TABLETS
- AURO -CANDESARTAN HCT – 16/12.5 MG TABLETS
- AURO-CARVEDILOL – 3.125, 6.25, 12.5 AND 25 MG TABLETS
- AURO-CELECOXIB – 100 AND 200 MG CAPSULES
- AURO-CEPHALEXIN – 125 MG/5 ML AND 250 MG/5 ML SUSPENSION
- AURO-CEPHALEXIN – 250 AND 500 MG TABLETS
- AURO-CITALOPRAM – 20 AND 40 MG TABLETS
- AURO-CLINDAMYCIN – 150 AND 300 MG CAPSULES
- AURO-CLOPIDOGREL – 75 MG TABLETS
- AURO-MIRTAZAPINE – 15 AND 30 MG TABLETS
- AURO-MIRTAZAPINE OD – 15, 30 AND 45 MG TABLETS
- AURO-OLANZAPINE ODT – 5, 10 AND 15 MG
- AURO-NITROFURANTOIN BID – 100MG CAPSULES
- AURO-OLANZAPINE ODT – 5, 10 AND 15 MG TABLETS
- AURO-OLMESARTAN – 20 AND 40 MG TABLETS
- AURO-OLMESARTAN HCTZ – 20/12.5, 40/12.5 AND 40/25 MG TABLETS
- AURO-ONDANSETRON ODT – 4 AND 8 MG TABLETS
- AURO-PANTOPRAZOLE – 40 MG TABLETS
- AURO-PAROXETINE – 10, 20 AND 30 MG TABLETS
- AURO-PERINDOPRIL – 2, 4 AND 8 MG TABLETS
- AURO-PRAVASTATIN – 10, 20 AND 40 MG TABLETS
- AURO-PREGABALIN – 25, 50, 75 AND 150 MG CAPSULES
- AURO-PROGESTERONE – 100MG CAPSULES
- AURO-QUETIAPINE – 25,100, 200 AND 300 MG TABLETS
- AURO-QUINAPRIL HCTZ – 10/12.5, 20/12.5 AND 20/25 MG TABLETS
- AURO-RAMIPRIL – 1.25, 2.5, 5 AND 10 MG CAPSULES

- AURO-RISEDRONATE – 35 MG TABLETS
- AURO-ROSUVASTATIN – 10, 20 AND 40 MG TABLETS
- AURO-SERTRALINE – 25, 50 AND 100 MG CAPSULES
- AURO-SIMVASTATIN – 5, 10, 20, 40 AND 80 MG TABLETS
- AURO-SOLIFENACIN – 5 AND 10 MG TABLETS
- AURO-TAMSULOSIN CR – 0.4 MG TABLETS
- AURO-TELMISARTAN – 40 AND 80 MG TABLETS
- AURO-TELMISARTAN HCTZ – 80/12.5 AND 80/25 MG TABLETS
- AURO-TERBINAFINE – 250 MG TABLETS
- AURO-TOPIRAMATE – 25, 100 AND 200 MG TABLETS
- AURO-TRANDOLAPRIL – 0.5, 1, 2 AND 4 MG CAPSULES
- AURO-VALACYCLOVIR – 500 MG TABLETS
- AURO-VALGANCYCLOVIR – 450 MG TABLETS
- AURO-VALSARTAN – 40, 80, 160 AND 320 MG TABLETS
- AURO-VALSARTAN HCT – 80/12.5, 160/12.5, 160/25, 320/12.5 AND 320/25 MG TABLETS
- AURO-VENLAFAXINE XR – 37.5, 75 AND 150 MG CAPSULES
- AURO-ZIPRASIDONE – 20, 40, 60 AND 80 MG CAPSULES
- AVALIDE 150/12.5 AND 300/12.5 MG TABLETS
- AVAPRO – 75, 150 AND 300 MG TABLETS
- AVENTYL – 10 AND 25 MG CAPSULES
- AXID – 150 AND 300 MG CAPSULES
- AZARGA – 1%/0.5% OPHTHALMIC SUSPENSION
- AZOPT – 1.0% – OPHTHALMIC SUSPENSION
- BACLOFEN INJECTION – 0.5 MG/ML AND 2MG/ML
- BACLOFEN (SANIS) – 10 AND 20 MG TABLETS
- BACLOFEN (SIVEM) – 10 AND 20 MG TABLETS
- BACLOFEN (STERIMAX) INTRATHECAL – 0.05, 0.5 AND 2 MG/ML INJECTION
- BACKUP PLAN ONESTEP – 1.5 MG KIT TO A MAXIMUM OF 3 TREATMENTS (3 TABLETS) PER BENEFIT YEAR
- BASAGLAR – 100 U/ML CARTRIDGE AND KWIKPEN
- BD SYRINGE WITH ULTRAFINE NEEDLE – 0.3 CC SYRINGE WITH 6MM/31G NEEDLE
- BD ULTRA-FINE NANO – 32G NEEDLE
- BENAZEPRIL (AA PHARMA) – 5, 10 AND 20 MG TABLETS
- BENZAC W10 – 10% GEL
- BETADERM – 0.05 AND 0.1% OINTMENT
- BETADERM – 0.1% CREAM
- BETADERM SCALP LOTION
- BETAHISTINE (SANIS) – 16 AND 24 MG TABLETS
- BETOPTIC S – 0.25% OPHTHALMIC SUSPENSION
- BEZALIP SR – 400 MG EXTENDED RELEASE TABLETS
- BICALUTAMIDE (SANIS) – 50 MG TABLETS
- BICNU – 100 MG POWDER FOR SOLUTION
- BIJUVA- 1MG/100MG CAPSULE
- BIO-CELECOXIB – 100 AND 200 MG CAPSULES
- BIO-DONEPEZIL – 5 AND 10 MG TABLETS
- BIO-FLUOXETINE – 10 AND 20 MG CAPSULES
- BIO-LOSARTAN – 25, 50 AND 100 MG TABLETS
- BIO QUETIAPINE – 25, 100, 200 AND 300 MG TABLETS
- BIONIME GE200 BLOOD GLUCOSE TEST STRIPS
- BIPAZEN – 4 MCG/ML INJECTION
- BIPHENTIN – 10, 15, 20, 30, 40, 50, 60 AND 80 MG CAPSULES
- BISOPROLOL (SANIS) – 5 AND 10 MG TABLETS
- BISOPROLOL (SIVEM) – 5 AND 10 MG TABLETS

- BRAVO BLOOD GLUCOSE TEST STRIPS
- BREO ELLIPTA – 100/25 MCG AND 200/25 MCG METERED DOSE INHALER
- BRICANYL TURBUHALER TO A MAXIMUM OF 2,200 DOSES PER BENEFIT YEAR
- BRIMONIDINE TARTRATE (HIKMA) – 0.2% OPHTHALMIC SOLUTION
- BROMOCRIPTINE (AA PHARMA) – 2.5 MG TABLETS AND 5 MG CAPSULES
- BRYHALI – 0.01 % TOPICAL LOTION
- BURINEX – 1 AND 5 MG TABLETS
- BUSCOPAN TABLETS – 10 MG TABLETS
- BUSPIRONE (SANIS) – 10 MG TABLETS
- CALCIMAR – 200IU/ML INJECTION
- CALCITRIOL INJECTION USP (STERIMAX) – 1 MCG/ML INJECTION
- CAMPRAL – 333 MG TABLETS
- CANDESARTAN (SIVEM) – 4, 8, 16 AND 32 MG TABLETS
- CANDESARTAN HCT (SIVEM) – 16/12.5 MG TABLETS
- CANDESARTAN/HCTZ (SANIS) – 16/12.5 MG AND 32 /12.5 TABLETS
- CAPECITABINE (JAMP) – 150 AND 500 MG TABLETS
- CAPECITABINE (SANIS) – 150 AND 500 MG TABLETS
- CAPILLARY BLOOD LETTING BLADES AND DEVICES
- CARBOLITH – 150, 300 and 600 MG CAPSULES
- CARVEDILOL – 6.25, 12.5 AND 25 MG TABLETS
- CARVEDILOL (SANIS) – 3.125, 6.25, 12.5 AND 25 MG TABLETS
- CARVEDILOL (SIVEM) – 3.125 MG TABLETS
- CASODEX – 50 MG TABLETS
- CCP-ANASTROZOLE – 1 MG TABLETS
- CCP-CITALOPRAM – 20 AND 40 MG TABLETS
- CCP-LETROZOLE – 2.5 MG TABLETS
- CCP-ONDANSETRON – 4 AND 8 MG TABLETS
- CEENU – 10 AND 40 MG CAPSULES
- CEFAZOLIN FOR INJECTION (TEVA) – 1 G INJECTION
- CEFAZOLIN FOR INJECTION – 1G/ VIAL (STERIMAX)
- CELEBREX – 100 AND 200 MG CAPSULES
- CELECOXIB (SANIS) – 100 AND 200 MG CAPSULES
- CELECOXIB (SIVEM) – 100 AND 200 MG CAPSULES
- CELEXA – 20 MG, 40 MG – TABLETS
- CELLCEPT – 250 MG CAPSULES AND 500 MG TABLETS
- CEPHALEXIN (SANIS) – 250 AND 500 MG TABLETS
- CEPHALEXIN (SIVEM) – 500 MG TABLETS
- CERUBIDINE – 20 MG/VIAL POWDER FOR SUSPENSION
- CESAMET – 0.5 AND 1 MG CAPSULES
- CHEMSTRIPS UG
- CHLORDIAZEPOXIDE (AA PHARMA) – 5, 10 AND 25 MG TABLETS
- CHOLESTYRAMINE-ODAN – 4G ORAL POWDER
- CIMETIDINE (AA PHARMA) – 300 MG TABLETS
- CIPRODEX – 0.3/0.1% OTIC SOLUTION
- CITALOPRAM (SANIS) – 10, 20 AND 40 MG TABLETS
- CITALOPRAM (SIVEM) – 10, 20 AND 40 MG TABLETS
- CLARUS – 10 AND 40 MG TABLETS
- CLASTEON – 400 MG CAPSULES
- CLICKFINE PEN NEEDLES – 31 AND 32G NEEDLES
- CLINDAMYCIN (SANIS) – 150 AND 300 MG CAPSULES
- CLINISTIX
- CLINITEST
- CLONIDINE (SIVEM) – 0.025, 0.1 AND 0.2 MG TABLETS
- CLOPIDOGREL (SANIS) – 75 MG TABLETS
- CLOPIDOGREL (SIVEM) – 75 MG TABLETS
- CLORAZEPATE (AA PHARMA) – 3.75, 7.5 AND 15 MG CAPSULES
- CLOZARIL – 25 AND 100 MG TABLETS
- COLCHICINE (ODAN) – 0.6 MG TABLETS

- COLESTID – 1 G TABLETS
- COLY-MYCIN M PARENTERAL – 75 MG/ML
- COMBIGAN – 0.2%/0.5% PER ML OPHTHALMIC SOLUTION
- COMBIVENT RESPIMAT – 20/100 MCG SOLUTION FOR INHALATION
- COMTAN – 200 MG TABLETS
- CONCERTA – 18, 27, 36 AND 54 MG TABLETS
- CONGEST 0.3, 0.625, 0.9, 1.25 and 2.5 MG TABLETS
- CONTINGENCY ONE – 1.5 MG KIT TO A MAXIMUM OF 3 TREATMENTS (3 TABLETS) PER BENEFIT YEAR
- CONTOUR BLOOD GLUCOSE TEST STRIPS
- CONTOUR NEXT BLOOD GLUCOSE TEST STRIPS
- CORTEF – 10 AND 20 MG TABLETS
- CORTISONE ACETATE – 25 MG TABLETS
- CORTODERM – 0.1% OINTMENT
- COSMEGEN – 0.5 MG/VIAL INJECTION
- COSOPT OPHTHALMIC SOLUTION
- COTAZYM ESC 20 – DELAYED RELEASE CAPSULES
- COTAZYM ESC 8 – DELAYED RELEASE CAPSULES
- COVERSYL – 2, 4 AND 8 MG TABLETS
- COVERSYL PLUS – 4 MG/1.25 MG TABLETS
- COVERSYL PLUS HD – 2.5 MG/8 MG TABLETS
- COVERSYL PLUS LD – 2/0.625 MG TABLETS
- COZAAR – 25, 50 AND 100 MG TABLETS
- CREON 10 – CAPSULES
- CREON 25 – CAPSULES
- CREON 35 – CAPSULES
- CREON MINIMICROSPHERES MICRO
- CRESTOR – 10, 20 AND 40 MG TABLETS
- CTP 30 – 30 MG TABLETS
- CUPRIMINE – 250 MG CAPSULES
- CYANOCOBALAMIN (STERIMAX) – 1000 MCG/ML INJECTION
- CYANOCOBALAMIN (STRIDES PHARMA) – 1,000 MCG/ML INJECTION
- CYANOCOBALAMIN INJECTION USP (HIKMA) – 1 MG/ML INJECTION
- CYCLOGYL – 1% OPHTHALMIC SOLUTION
- CYCLOMEN – 50, 100 AND 200 MG CAPSULES
- CYKLOKAPRON – 500 MG TABLETS
- CYMBALTA – 30 AND 60 MG CAPSULES
- CYPROTERONE (AA PHARMA) – 50 MG TABLETS
- CYSTADANE POWDER FOR ORAL SOLUTION
- CYSTISTAT LIQUID – 0.8 MG/ML
- CYTARABINE (FLD) – 100 MG/ML INJECTION
- CYTOMEL – 5 MCG AND 25 MCG TABLETS
- CYTOSAR – 100 MG/5 ML POWDER FOR SOLUTION
- CYTOVENE – 500 MG POWDER FOR INJECTION
- DALACIN C CAPSULES – 300 MG
- DALACIN C FLAVORED GRANULES
- DANTRIUM – 25 MG CAPSULES
- DAPSONE – 100 MG TABLETS
- DARIO BLOOD GLUCOSE TEST STRIPS
- DARIO LANCETS
- DDAVP INJECTION
- DDAVP MELT – 60 AND 120 MCG TABLETS
- DEFEROXAMINE MESYLATE FOR INJECTION – 500 MG/VIAL POWDER FOR SOLUTION
- DELATESTRYL – 1000 MG/5 ML INJECTION
- DEPAKENE – 50 MG/ML SYRUP

- DEPO-MEDROL- 40MG/ML&80MG/ML INJECTION
- DEPO-MEDROL- 40MG/ML&80MG/ML INJECTION (WITH PRESERVATIVE)
- DEPO-TESTOSTERONE INJ - 100 MG/ML INJECTION
- DERMA-SMOOTH/FS - 0.01% LIQUID
- DERMOVATE - 0.5% CREAM, OINTMENT AND SCALP LOTION
- DESFERAL - 500 MG INJECTION
- DESIPRAMINE (AA PHARMA) - 10, 25, 50, 75 AND 100 MG TABLETS
- DETROL - 1 AND 2 MG TABLETS
- DETROL LA - 2 AND 4 MG EXTENDED RELEASE CAPSULES
- DEXAMETHASONE - 0.1% OPHTHALMIC SOLUTION
- DEXAMETHASONE PHOSPHATE - 4 MG/ML INJECTION (SANDOZ)
- DEXEDRINE - 5 MG TABLETS
- DEXEDRINE SPANSULE - 10 AND 15 MG CAPSULES
- DEXTROAMPHETAMINE - 5 MG TABLETS
- DIAMICRON MR - 30 AND 60 MG SUSTAINED RELEASE TABLETS
- DIASTIX
- DIAZEPAM (AA PHARMA) - 2, 5 AND 10 MG TABLETS
- DICETEL - 50 MG, 100 MG TABLETS
- DICLECTIN - 10/10 MG TABLETS
- DICLOFENAC EC (SANIS) - 50 MG TABLETS
- DICLOFENAC (PHARMA STULLN) - 0.1% OPHTHALMIC SOLUTION
- DIHYDROERGOTAMINE MESYLATE - 1 MG/ML INJECTION
- DILANTIN - 30 AND 100 MG CAPSULES
- DILANTIN-30 SUSPENSION - 30 MG/5 ML ORAL SUSPENSION
- DILANTIN INFATABS - 50 MG CHEWABLE TABLETS
- DILAUDID - 1, 2, 4 AND 8 MG TABLETS
- DILTIAZEM CD (SANIS) - 120, 180, 240 AND 300 MG CONTROLLED DELIVERY CAPSULES
- DILTIAZEM T - 120, 180, 240, 300 AND 360 MG EXTENDED RELEASE CAPSULES
- DIOVAN - 40, 80 AND 160 MG TABLETS
- DIOVAN-HCT - 80/12.5, 160/12.5 AND 160/25 MG MG TABLETS
- DIPENTUM - 250 MG CAPSULES

- XYLAC – 25 MG/ML ORAL SOLUTION
- XYLAC – 2.5, 5, 10, 25 AND 50 MG TABLETS
- YPSOPUMP INSET – 6 OR 9 MM CANNULA AND 18’’/45, 24’’/60, 31’’/80 OR 43’’/110 CM TUBING INFUSION SET
- YPSOPUMP ORBIT MICRO – 5.5 OR 8.5 MM CANNULA INFUSION SET
- YPSOPUMP ORBIT MICRO – 5.5 OR 8.5 MM CANNULA AND 18’’/45, 24’’/60, 31’’/80 OR 43’’/110 CM TUBING INFUSION SET
- YPSOPUMP ORBIT SOFT – 6 OR 9 MM CANNULA INFUSION SET

- YPSOPUMP ORBIT SOFT – 6 OR 9 MM CANNULA AND 18"/45, 24"/60, 31"/30 OR 43"/110 CM TUBING INFUSION SET
 - YPSOPUMP RESERVOIR
 - ZARONTIN – 250 MG CAPSULES AND 50 MG/ML SYRUP
 - ZAROXOLYN – 2.5 MG TABLETS
 - ZELDOX – 20, 40, 60 AND 80 MG CAPSULES
 - ZENHALE – 5/50 MCG, 5/100 MCG AND 5/200 MCG METERED DOSE INHALER
 - ZESTORETIC – 10/12.5, 20/12.5 AND 20/25 MG TABLETS
 - ZESTRIL – 5, 10 AND 20 MG TABLETS
 - ZOCOR – 10, 20 AND 40 MG TABLETS
 - ZOFRAN – 4 MG/5 ML ORAL SOLUTION
 - ZOLOFT – 25, 50 AND 100 MG CAPSULES
 - ZOPICLONE (SANIS) – 5 AND 7.5 MG TABLETS
 - ZOPICLONE (SIVEM) – 5 AND 7.5 MG TABLETS
 - ZOVIRAX CREAM, OINTMENT AND SUSPENSION
 - ZYPREXA – 2.5, 5, 7.5, 10 AND 15 MG TABLETS
 - ZYPREXA ZYDIS – 5, 10 AND 15 MG ORALLY DISINTEGRATING TABLETS
- EXTEMPORANEOUS COMPOUNDED PRESCRIPTIONS – IF THE MAIN THERAPEUTIC INGREDIENT IN THE PREPARATION IS LISTED IN THIS SCHEDULE, AND IS MIXED TOGETHER WITH OTHER INGREDIENTS IN ACCORDANCE WITH A PRESCRIPTION TO PROVIDE A CUSTOMIZED FORMULA WITHOUT DUPLICATING A COMMERCIALY-AVAILABLE PRODUCT. THIS DOES NOT INCLUDE RECONSTITUTING A DRUG WITH ONLY WATER.

PART 2

Any one of the following for the length of time and conditions specified:

- ACH-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- ACH-MONTELUKAST – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- ACT AZITHROMYCIN – 600 mg Tablets – For the treatment of patients with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare.
- ACT CIPROFLOXACIN – 250, 500 and 750 mg Tablets –
 - (a) Step down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram negative infections;

- (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulphonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopaedic surgery; or
 - (g) Treatment of chronic bacterial prostatitis.
- ACT-CLARITHROMYCIN XL – 500 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare; and
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
 - ACT FLUCONAZOLE – 50 and 100 mg Tablets – For the prophylaxis and treatment of:
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
 - ACT LEVOFLOXACIN – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of gram-negative infections resistant to standard therapy;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of bacterial prostatitis;
 - (e) Treatment of respiratory infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides;
 - (f) Treatment of diabetic foot infections;
 - (g) Treatment of community acquired pneumonia with co-morbid illness or failure of first-line therapy;
 - (h) Treatment of pneumonia in long-term care patients.
 - ACT PRAMIPEXOLE – 0.25, 0.5, 1 and 1.5 mg Tablets – For the treatment of idiopathic Parkinson's Disease.
 - ACT RIZATRIPTAN – 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - ACT RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - ACT SUMATRIPTAN – 50 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

- AG-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (e.g. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and over) with documented intolerance to erythromycin.
- AG-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- AG-MOXIFLOXACIN – 400 mg Tablets
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (e.g. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- AG-RIZATRIPTAN ODT – 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- AG-ZOLMITRIPTAN ODT – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- AMERGE – 1 mg and 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- AMOXICILLIN/CLAV (SANIS)– 500/125 and 875/125 mg tablets –
 - (a) for the treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - (b) for the treatment of patients with infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin).
- APO-AMOXI CLAV – 250 mg/125 mg, 500 mg/125 mg and 875 mg/125 mg Tablets and 400/57 mg/5 mL Suspension –
 - (a) for the treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - (b) for the treatment of patients with infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin).
- APO-AZITHROMYCIN Z – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia.

- APO-CEFUROXIME – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- APO-CLARITHROMYCIN – 250 and 500 mg Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- APO-CLARITHROMYCIN XL – 500 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H.pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- APO-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- APO-DESMOPRESSIN – 0.1 and 0.2 mg Tablets – For the treatment of:
 - (a) diabetes insipidus;
 - (b) enuresis in children refractory to alternative agents.
- APO-DUTASTERIDE – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- APO-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- APO-FLUCONAZOLE – 150 mg Capsules – For single dose treatment of vaginal candidiasis in patients who fail or are intolerant to topical antifungal therapy.
- APO-FLUCONAZOLE – 50 and 100 mg Tablets – For the prophylaxis and treatment of
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- APO-GABAPENTIN – 100, 300 and 400 mg Capsules and 600 mg Tablets – For the treatment of neuropathic pain

associated with diabetic peripheral neuropathy (DPN), post herpetic neuralgia (PHN) and spinal cord injury patients who have failed an adequate trial with a tricyclic antidepressant (eg. nortriptyline, imipramine, desipramine, amitriptyline).

– APO-LEVOFLOXACIN – 250 and 500 mg Tablets –

- (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
- (b) Treatment of gram-negative infections resistant to standard therapy;
- (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
- (d) Treatment of bacterial prostatitis;
- (e) Treatment of respiratory infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides;
- (f) Treatment of diabetic foot infections;
- (g) Treatment of community acquired pneumonia with co-morbid illness or failure of first-line therapy;
- (h) Treatment of pneumonia in long-term care patients.

– APO-MONTELUKAST – 4, 5 and 10 mg Tablets –

- (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
- (b) Indicated as first line therapy for exercise induced asthma.

– APO-MOXIFLOXACIN – 400 mg Tablets –

- (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
- (b) Treatment of resistant gram-positive or gram-negative infections;
- (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
- (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.

– APO-NARATRIPTAN – 1 and 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

– APO-PRAMIPEXOLE – 0.25, 0.5, 1 and 1.5 mg Tablets – For the treatment of idiopathic Parkinson's Disease.

– APO-RIZATRIPTAN – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

– APO-SUMATRIPTAN – 50 and 100 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

– APO-TICAGRELOR – 90 mg Tablets – For the treatment of patients with:

- (a) Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI,

NSTEMI or UA after prior revascularization via percutaneous coronary intervention (PCI); or

(b) STEMI and undergoing revascularization via PCI; or

(c) NSTEMI, UA or high risk angiographic anatomy and undergoing revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).

- ARTHROTEC – 50 mg/200 mcg and 75 mg/200 mcg Tablets – For patients receiving long-term diclofenac sodium enteric coated tablets who require the addition of misoprostol.
- AURO-AMOXICLAV – 250 mg/125 mg, 500 mg/125 mg and 875 mg/125 mg Tablets
 - (a) for the treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - (b) for the treatment of patients with infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin).
- AURO-AZITHROMYCIN – 100 mg/5 mL and 200 mg/5 mL Oral Suspension – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of *H. pylori*;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- AURO-CEFIXIME – 100 mg/5 ml suspension –
 - a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - b) For treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - c) For treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - d) For treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- AURO-CEFIXIME – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- AURO-CEFPROZIL – 500 mg Tablets, and 125 mg/5 mL and 250 mg/5 mL Oral Suspension –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);

- (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- AURO-CEFUROXIME – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
 - AURO-CIPROFLOXACIN – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
 - AURO-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
 - AURO-DUTASTERIDE – 0.5 mg Capsules – For the treatment of symptomatic benign prostatic hyperplasia.
 - AURO-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
 - AURO-MONTELUKAST – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. eg. Adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
 - AURO-MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);

(d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.

- AURO-PRAMIPEXOLE – 0.25, 0.5, 1 and 1.5 mg Tablets – For the treatment of idiopathic Parkinson's Disease.
- AURO-RIZATRIPTAN – 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- AURO-TOFACITINIB – 5 mg & 10mg Tablets – (a) For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:
 - (i) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented.
 - (ii) tried one combination therapy of DMARDS, and
 - (iii) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or the C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

(b) For the treatment of patients 18 years of age or older with moderate to severe active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

NOTE: Coverage will be provided only if prescribed by a specialist in gastroenterology

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

- AURO-ZOLMITRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- AVELOX – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- AVODART – 0.5 mg capsules – For the treatment of symptomatic benign prostatic hyperplasia.
- AZITHROMYCIN (SIVEM) – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia.
- BAQSIMI – 3 mg Powder – For the treatment of severe hypoglycemia (SH) reactions in patients with diabetes mellitus who are receiving insulin therapy and are at high risk SH, when impaired consciousness precludes oral carbohydrates. Coverage will be provided for up to 7 devices per benefit year.

- BIAXIN – 125 and 250 mg/5 mL Powder for Suspension and 250 and 500 mg Tablets – For treatment of patients:
 - (a) Not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) With mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) In combination therapy in the treatment of H. pylori;
 - (d) With pneumonia;
 - (e) With infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- BRILINTA – 90 mg Tablets – For the treatment of patients with:
 - (a) Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI, NSTEMI or UA after prior revascularization via percutaneous coronary intervention (PCI); or
 - (b) STEMI and undergoing revascularization via PCI; or
 - (c) NSTEMI, UA or high risk angiographic anatomy and undergoing revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).
- CALCITRIOL-ODAN – 0.25 and 0.5 mcg Capsules – For the management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism, and Vitamin D resistant rickets.
- CALCITRIOL (STRIDES PHARMA) – 0.25 and 0.5 mcg Capsules – For the management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism and Vitamin D-resistant rickets.
- CCP-RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- CCP-ZOLMITRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- CEFTIN – 125 mg/5 mL Suspension –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or Sulfonamides).
- CILOXAN – 0.3% Ophthalmic Solution and 0.3% Ophthalmic Ointment – For treatment of ophthalmic infections caused by gram-negative organisms or those not responding to alternative agents.
- CIPRO – 10 g/100 mL Oral Suspension –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;

- (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and Sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
- CIPROFLOXACIN (SANIS) – 250 and 500 mg Tablets
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
 - CIPROFLOXACIN (SIVEM) – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
 - CLARITHROMYCIN (SANIS) – 250 mg and 500 Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
 - CLARITHROMYCIN (SIVEM) – 250 and 500 mg Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);

- (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin
- CLAVULIN – 500 mg/125 mg and 875 mg/125 mg Tablets, and 25 and 50 mg/mL, 200 mg/5 mL, 400 mg/5 mL Suspensions –
 - (a) For treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - (b) For treatment of patients with infections caused by organisms known to be resistant to alternative antibiotics (eg. Amoxicillin).
 - CLIMARA – 3.9 mg/patch – Transdermal System – For patients
 - (a) who are smokers (current);
 - (b) with increased triglycerides;
 - (c) with a history of cholelithiasis; or
 - (d) who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc) or who cannot take any medications by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).
 - CYCLOBENZAPRINE (SANIS) – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
 - CYCLOBENZAPRINE (SIVEM) – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
 - DALACIN – 2% Vaginal Cream – For treatment of bacterial vaginosis for patients who fail oral metronidazole or are intolerant to oral metronidazole or are pregnant.
 - DESMOPRESSIN (AA PHARMA) – 10 mcg Spray – For the treatment of
 - (a) diabetes insipidus; and
 - (b) enuresis in children refractory to alternate agents.
 - DEXCOM G6 – Sensor – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump. Coverage will be provided for up to 45 sensors per benefit year.
 - DEXCOM G6 – Transmitter – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump. Coverage will be provided for up to 5 transmitters per benefit year.
 - DEXCOM G7 – Sensor – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump. Coverage will be provided for up to 45 sensors per benefit year.
 - DEXCOM G7 –Receiver – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or

using an insulin pump.

Coverage will be provided for 1 receiver per client lifetime.

- DIFLUCAN – 250 ml P.O.S. – For the prophylaxis and treatment of
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- DIVIGEL – 0.25 mg, 0.5 mg and 1 mg Sachets – For patients
 - (a) Who are smokers (current);
 - (b) With increased triglycerides;
 - (c) With a history of cholelithiasis; or
 - (d) Who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc.) or who cannot take any medication by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).
- DOM-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- DUTASTERIDE (SANIS) – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- DUTASTERIDE (SIVEM) – 0.5 mg Capsules – For the treatment of symptomatic benign prostatic hyperplasia.
- ESTALIS – 140/50 and 250/50 mcg Transdermal Patch – For patients
 - (a) who are smokers (current);
 - (b) with increased triglycerides;
 - (c) with a history of cholelithiasis; or
 - (d) who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc) or who cannot take any medications by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).
- ESTRADOT – 25, 37.5, 50, 75, 100 mcg Transdermal Patch – For patients:
 - (a) who are smokers (current);
 - (b) with increased triglycerides; and
 - (c) with a history of cholelithiasis; or who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc.) or who cannot take any medications by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).
- ESTROGEL – 0.06% Transdermal Gel – For patients
 - (a) who are smokers (current);
 - (b) with increased triglycerides;
 - (c) with a history of cholelithiasis; or
 - (d) who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc) or who cannot take any medications by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).

- FINASTERIDE (SANIS) – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- FINASTERIDE (SIVEM) – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- FLEXERIL – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- FLUCONAZOLE (SANIS) – 50 and 100 mg Tablets – For the prophylaxis and treatment of:
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- FLUCONAZOLE(SIVEM)– 50 and 100 mg Tablets – For the prophylaxis and treatment of:
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- FLUCONAZOLE (SANIS) – 150 mg Capsule – For a single dose treatment of vaginal candidiasis in patients who fail or are intolerant of topical antifungal therapy.
- FLUNARIZINE (AA PHARMA) – 5 mg Capsules – For prophylaxis of migraines in cases where alternative prophylactic agents have not been effective.
- FREESTYLE LIBRE and LIBRE 2 – Sensor – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump. Coverage will be provided for up to 33 sensors per benefit year.
- GD-DICLOFENAC/MISOPROSTOL – 50 mg/200 mcg and 75 mg/200 mcg Tablets – For patients receiving long-term diclofenac sodium enteric coated tablets who require the addition of misoprostol.
- GENOTROPIN – 5.3 and 12 mg Pen and 0.6, 0.8, 1, 1.2, 1.4, 1.6, 1.8 and 2 mg Injections
 - (a) For the long term management of children who have growth failure due to an inadequate secretion of normal endogenous growth hormone;
 - (b) For the treatment of children who have growth failure associated with chronic renal failure insufficiency up to the time of renal transplant;
 - (c) For the treatment of short stature associated with Turner Syndrome in patients whose epiphyses are not closed.
- HUMATROPE – 6.0, 12.0 and 24 mg/cartridge Injection –
 - (a) For the long term management of children who have growth failure due to an inadequate secretion of normal endogenous growth hormone;
 - (b) For treatment of children who have growth failure associated with chronic renal failure insufficiency up to the time of renal transplant;
 - (c) For treatment of short stature associated with Turner Syndrome in patients whose epiphyses are not closed.
- IMITREX – 5 mg and 20 mg Nasal Spray – For treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 sprays per benefit year.
- IMITREX DF – 50 and 100 mg Tablets – For treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- JAMP AMOXI CLAV – 250/125, 500/125 and 875/125 mg Tablets and 200/28.5 mg/5 mL, 250/62.5 mg/5 mL and

400/57 mg/5 mL oral suspension–

- a) For treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - b) For treatment of patients with infections caused by organisms known to be resistant to alternative (eg. amoxicillin).
- JAMP-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
- (a) Not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) With mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) With sexually transmitted disease due to Chlamydia;
 - (d) With pneumonia;
 - (e) With infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- JAMP-CIPROFLOXACIN – 250, 500 and 750 mg Tablets –
- (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulphonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopaedic surgery; or
 - (g) Treatment of chronic bacterial prostatitis.
- JAMP-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- JAMP-DUTASTERIDE – 0.5 mg Capsules – For the treatment of symptomatic benign prostatic hyperplasia.
- JAMP-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- JAMP-FLUCONAZOLE – 150 mg Capsule – For a single dose treatment of vaginal candidiasis in patients who fail or are intolerant of topical antifungal therapy.
- JAMP-ITRACONAZOLE – 10 mg/ml Oral Solution – For the prophylaxis and treatment of:
- (a) Onychomycosis, oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) Systemic fungal infections other than oropharyngeal candidiasis.
- JAMP LEVOFLOXACIN – 250 and 500 mg Tablets –
- (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of gram-negative infections resistant to standard therapy;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);

- (d) Treatment of bacterial prostatitis;
 - (e) Treatment of respiratory infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides;
 - (f) Treatment of diabetic foot infections;
 - (g) Treatment of community acquired pneumonia with co-morbid illness or failure of first-line therapy;
 - (h) Treatment of pneumonia in long-term care patients.
- JAMP-MONTELUKAST – 4, 5 and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- JAMP-MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- JAMP OSELTAMIVIR – 30 and 75 mg Capsules – For the treatment OR prevention of influenza in persons who meet one or more of the following risk factors:
 - (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (e.g. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjogren's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (e.g.

cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);

(k) children younger than 2 years of age;

(l) individuals 65 years of age or older;

(m) individuals of any age who are residents of nursing homes or other chronic care facilities;

(n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;

(o) individuals younger than 18 years of age who are on chronic aspirin therapy;

(p) morbid obesity (BMI 40 or greater);

(q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;

(r) persons exposed to avian influenza.

– JAMP PRASUGREL – 10 mg Tablets – In combination with acetylsalicylic acid (ASA) for patients with:

(a) ST segment elevation myocardial infarction (STEMI) undergoing primary percutaneous coronary intervention (PCI) who have not received coronary intervention (PCI) who have not received antiplatelet therapy prior to arrival in the antiplatelet therapy prior to arrival in the catheterization lab; or

(b) Acute coronary syndrome (CS) who have failed on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI, or non ST segment elevation myocardial infarction (NSTEMI) managed or unstable angina (UA) after prior revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).

– JAMP-RIZATRIPTAN – 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

– JAMP-RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

– JAMP TICAGRELOR– 90 mg Tablets – For the treatment of patients with:

(a) Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI, NSTEMI or UA after prior revascularization via percutaneous coronary intervention (PCI); or

(b) STEMI and undergoing revascularization via PCI; or

(c) NSTEMI, UA or high risk angiographic anatomy and undergoing revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).

– JAMP-TOFACITINIB – 5 mg Tablets

(a) For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:

(i) failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide, unless intolerance or contraindications to these agents is documented.

(ii) tried one combination therapy of DMARDS, and

(iii) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or the C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus Kinase(JAK) inhibitors will not be reimbursed.

(b) For the treatment of patients 18 years of age or older with moderate to severe active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy, including 5-aminosalicylate compounds AND corticosteroids.

NOTE: Coverage will be provided only if prescribed by a specialist in gastroenterology.

Combined use with other biologic drugs or Janus Kinase(JAK) inhibitors will not be reimbursed.

- JAMP VANCOMYCIN – 125 AND 250 mg Capsules – For treatment of pseudomembranous colitis unresponsive to metronidazole.
- JAMP-ZOLMITRIPTAN/JAMP-ZOLMITRIPTAN ODT – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- LUPRON DEPOT – 3.75, 7.5, 11.25, 22.5 and 30 mg/vial Intramuscular Injection – For the treatment of:
 - (a) gynecological disorders excepting fertility disorders;
 - (b) for the treatment of children with precocious puberty.
- M-AMOXI CLAV – 250 mg/62.5 mg/5 mL and 400 mg/57mg/5 mL oral suspension –
 - a) For treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - b) For treatment of patients with infections caused by organisms known to be resistant to alternative (eg. amoxicillin).
- M-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- M-CLARITHROMYCIN – 250 and 500 mg Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- M-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.

- M-MONTELUKAST – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- M-MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- M-TICAGRELOR – 90 mg Tablets – For the treatment of patients with:
 - (a) Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI, NSTEMI or UA after prior revascularization via percutaneous coronary intervention (PCI); or
 - (b) STEMI and undergoing revascularization via PCI; or
 - (c) NSTEMI, UA or high risk angiographic anatomy and undergoing revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).
- MAR-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- MAR-CIPROFLOXACIN – 250, 500 and 750 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;

- (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
- (g) Treatment of chronic bacterial prostatitis.
- MAR-MONTELUKAST – 4, 5 and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- MAR-MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- MAR-OSELTAMIVIR – 30, and 75 mg Capsules – For the treatment OR prevention of influenza in persons who meet one or more of the following risk factors:
 - (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (e.g. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjogren's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (e.g. cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);
 - (k) children younger than 2 years of age;
 - (l) individuals 65 years of age or older;

- (m) individuals of any age who are residents of nursing homes or other chronic care facilities;
 - (n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;
 - (o) individuals younger than 18 years of age who are on chronic aspirin therapy;
 - (p) morbid obesity (BMI 40 or greater);
 - (q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;
 - (r) persons exposed to avian influenza.
- MAR-RIZATRIPTAN ODT – 10 mg Orally Disintegrating Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - MAXALT RPD and MAXALT – 5 and 10 mg Wafers and 10 mg Tablets – For treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 wafers or tablets per benefit year.
 - MED-DUTASTERIDE – 0.5 mg Capsules – For the treatment of symptomatic benign prostatic hyperplasia.
 - MED-MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
 - METADOL-D 10 mg/ml – Oral solution – For the treatment of patients who
 - (a) are being treated with Metadol-D; or
 - (b) have previously been treated with two or more methadone products listed under Part 1.
 - MEDTRONIC GUARDIAN SENSOR (3) CGM – Sensor – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump.
Coverage will be provided for up to 65 sensors per benefit year.
 - MEDTRONIC GUARDIAN SENSOR (4) CGM – Sensor – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump.
Coverage will be provided for up to 65 sensors per benefit year.
 - MEDTRONIC GUARDIAN LINK (3) TRANSMITTER (FOR MINIMED 670 and 770 G PUMP) – Kit – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump.
Coverage will be provided for up to 1 kit per benefit year.
 - MEDTRONIC GUARDIAN LINK (4) TRANSMITTER – Kit – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump.
Coverage will be provided for up to 1 kit per benefit year.
 - MEDTRONIC GUARDIAN CONNECT TRANSMITTER STARTER – Kit – For patients with type 1 or type 2 diabetes currently on both basal and bolus insulin or using an insulin pump.
Coverage will be provided for up to 1 kit per benefit year.

- METHADOSE – 10 mg/ml – Oral solution – For the treatment of patients who
 - (a) are being treated with Methadose, or
 - (b) have previously been treated with two or more methadone products listed under Part 1.
- MINOCYCLINE (AA PHARMA) – 50 and 100 mg Capsules –
 - (a) For treatment of acne unresponsive to tetracycline or erythromycin;
 - (b) For rheumatoid arthritis patients who have failed two other second line agents.
- MINT-CIPROFLOX – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides).
- MINT-CIPROFLOXACIN – 250 and 500 mg Tablets –
 - (a) step down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) treatment of resistant gonococcal infections;
 - (d) treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and Sulfonamides);
 - (e) treatment of infections in immunocompromised patients;
 - (f) treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) treatment of chronic bacterial prostatitis.
- MINT DUTASTERIDE – 0.5 mg Capsules – For the treatment of symptomatic benign prostatic hyperplasia.
- MINT-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- MINT-ITRACONAZOLE – 100 mg Capsules – For the prophylaxis and treatment of:
 - (a) Onychomycosis, oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) Systemic fungal infections other than oropharyngeal candidiasis.
- MINT-LEVOFLOXACIN – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of gram-negative infections resistant to standard therapy;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of bacterial prostatitis;

- (e) Treatment of respiratory infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides;
 - (f) Treatment of diabetic foot infections;
 - (g) Treatment of community acquired pneumonia with co-morbid illness or failure of first-line therapy;
 - (h) Treatment of pneumonia in long-term care patients.
- MINT-MONTELUKAST – 4, 5 and 10 mg Tablets –
- (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. Eg. Adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- MINT-OSELTAMIVIR – 30 and 75 mg Capsules – For the treatment OR prevention of influenza in persons who meet one or more of the following risk factors:
- (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (e.g. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjogren's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (e.g. cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);
 - (k) children younger than 2 years of age;
 - (l) individuals 65 years of age or older;
 - (m) individuals of any age who are residents of nursing homes or other chronic care facilities;
 - (n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;
 - (o) individuals younger than 18 years of age who are on chronic aspirin therapy;
 - (p) morbid obesity (BMI 40 or greater);

- (q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;
- (r) persons exposed to avian influenza.
- MINT-ZOLMITRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- MIRAPEX – 0.25 mg Tablets – For the treatment of idiopathic Parkinson's disease.
- MONTELUKAST (SANIS) – 5 mg Chewable Tablets and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- MONTELUKAST (SIVEM) – 4 and 5 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. Eg. Adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- MONTELUKAST (SIVEM) – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists (eg. adrenal suppression, increased lung infections);
 - (b) Indicated as first line therapy for exercise induced asthma.
- MOXIFLOXACIN (SANIS) – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- MYLAN-FLUCONAZOLE – 50 and 100 mg Tablets – For the prophylaxis and treatment of
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- MYLAN-RIZATRIPTAN ODT – 5 and 10 mg Controlled Release Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

- MYLAN-SUMATRIPTAN – 50 and 100 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- NAT-MONTELUKAST – 4 and 5 mg Chewable Tablets and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists. eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- NAT-OSELTAMIVIR – 30, 45 and 75 mg Tablets and 6 mg/mL Oral Suspension – For the treatment OR prevention of Influenza in persons who meet one or more of the following risk factors:
 - (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (eg. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjorgen's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (eg. cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);
 - (k) children younger than 2 years of age;
 - (l) individuals 65 years of age or older;
 - (m) individuals of any age who are residents of nursing homes or other chronic care facilities;
 - (n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;
 - (o) individuals younger than 18 years of age who are on chronic aspirin therapy;
 - (p) morbid obesity (BMI 40 or greater);
 - (q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;
 - (r) persons exposed to avian influenza.
- NAT-RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where

standard therapy has failed – to a maximum of 144 tablets per benefit year.

- NAT-ZOLMITRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- NGENLA – 20mg/ml and 50mg/ml – For the long-term treatment on pediatric patients who have growth failure due to an inadequate secretion of endogenous growth hormone (growth hormone deficiency [GHD]) only if the following conditions are met:

Initiation:

-Pre-pubertal children who are at least 3 years of age, and who are diagnosed with either isolated GHD, or growth hormone insufficiency as part of multiple pituitary hormone deficiency.

Discontinuation:

-Treatment with somatogon must be discontinued upon the occurrence of any of the following:

- 1) Height velocity is less than 2 cm per year and bone age is more than 16 years in boys and 14 years in girls
- 2) Closure of the epiphyseal growth plates

This medication should be prescribed by, or in consultation with, a specialist in this treatment area (i.e. pediatric endocrinologist)

- NIDAGEL – 0.75% Vaginal Gel – For treatment of bacterial vaginosis for patients who fail oral metronidazole or are intolerant to oral metronidazole, or are pregnant in the second and third trimester.
- NORDITROPIN NORDIFLEX (NOVO NORDISK) – 5 mg/1.5 mL, 10 mg/1.5 mL and 15 mg/1.5 mL Pen – For the long term management of children who have growth failure due to inadequate secretion of normal endogenous growth hormone.
- NORDITROPIN FLEXPLO (NOVO NORDISK)
5 mg/1.5 mL, 10 mg/1.5 mL and 15 mg/1.5 mL
Pre-filled pen- For the long term management of children who have growth failure due to inadequate secretion of normal endogenous growth hormone.
- NORFLOXACIN (AA PHARMA) – 400 mg Tablets –
 - (a) For treatment of urinary tract infections caused by *Pseudomonas aeruginosa*;
 - (b) For treatment of urinary tract infections not responding to alternative therapy (eg. penicillins, cephalosporins and sulfonamides);
 - (c) For treatment of urinary tract infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) For treatment of chronic bacterial prostatitis.
- NRA-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients
 - (a) not responding to or intolerant of alternative antibiotics (e.g. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to *Mycobacterium avium* and *Mycobacterium intracellulare*;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and over) with documented intolerance to erythromycin.

- NRA-CIPROFLOXACIN – 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis
- NRA-DUTASTERIDE – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- NRA-MONTELUKAST – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- NRA-RIZATRIPTAN ODT – 10 mg Tablets –
For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- NRA-ZOLMITRIPTAN – 2.5 mg Tablets –
For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- NUTROPIN AQ NUSPIN – 5 mg/2 mL, 10 mg/2 mL and 20 mg/2 mL Injection –
 - (a) For the long term management of children who have growth failure due to an inadequate secretion of normal endogenous growth hormone;
 - (b) For the treatment of children who have growth failure associated with chronic renal failure insufficiency up to the time of renal transplant;
 - (c) For treatment of short stature associated with Turner Syndrome in patients whose epiphyses are not closed.
- OCUFLOX – 0.3% Ophthalmic Solution – For the treatment of ophthalmic infections caused by gram-negative organisms or those not responding to alternative agents.
- ODAN ITRACONAZOLE – 10 mg/mL Oral Solution – For the prophylaxis and treatment of:
 - (a) Onychomycosis, oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) Systemic fungal infections other than oropharyngeal candidiasis.
- OESCLIM – 25 mcg, 50 mcg – Transdermal Patch – For patients
 - (a) who are smokers (current);
 - (b) with increased triglycerides;

(c) with a history of cholelithiasis; or

(d) who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc) or who cannot take any medications by mouth. Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).

- OMNITROPE (SANDOZ) – 5 mg/1.5 mL, 10 mg/1.5 mL and 15 mg/1.5 mL Injection – For the long term management of children who have growth failure due to inadequate secretion of normal endogenous growth hormone.
- ONE ALPHA – 0.25 and 1.0 ug Capsules and 0.2 ug/ml Solution – For the management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism, and Vitamin D resistant rickets.
- OSELTAMIVIR (STRIDES PHARMA) – 30, 45 and 75 mg Capsules – For the treatment OR prevention of influenza in persons who meet one or more of the following risk factors:
 - (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (e.g. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjogren's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (e.g. cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);
 - (k) children younger than 2 years of age;
 - (l) individuals 65 years of age or older;
 - (m) individuals of any age who are residents of nursing homes or other chronic care facilities;
 - (n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;
 - (o) individuals younger than 18 years of age who are on chronic aspirin therapy;
 - (p) morbid obesity (BMI 40 or greater);
 - (q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;
 - (r) persons exposed to avian influenza.

- PMS-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- PMS-AZITHROMYCIN – 600 mg Tablets – For the treatment of patients with mycobacterium avium and mycobacterium intracellulare.
- PMS-CIPROFLOXACIN – 250, 500 and 750 mg Tablets
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
- PMS-CLARITHROMYCIN – 250 and 500 mg Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- PMS-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.
- PMS-DICLOFENAC-MISOPROSTOL – 50 mg/200 mcg and 75 mg/200 mcg Tablets – For the treatment of patients receiving long-term diclofenac sodium enteric coated tablets who require the addition of misoprostol.
- PMS-DESMOPRESSIN – 0.1 and 0.2 mg Tablets – For the treatment of:
 - (a) diabetes insipidus;
 - (b) enuresis in children refractory to alternative agents.

- PMS-DUTASTERIDE – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- PMS-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- PMS-FLUCONAZOLE – 50 and 100 mg Tablets – For the prophylaxis and treatment of
 - (a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and
 - (b) systemic fungal infections other than oropharyngeal candidiasis.
- PMS-MONTELUKAST – 4, 5 and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists (eg. adrenal suppression, increased lung infections);
 - (b) Indicated as first line therapy for exercise induced asthma.
- PMS-RIZATRIPTAN RDT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- PMS-SUMATRIPTAN – 50 and 100 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- PMS-TOFACITINIB – 5 mg Tablets –
 - (a) For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:
 - (i) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented.
 - (ii) tried one combination therapy of DMARDS, and
 - (iii) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or the C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

- (b) For the treatment of patients 18 years of age or older with moderate to severe active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

NOTE: Coverage will be provided only if prescribed by a specialist in gastroenterology

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

- PMS-ZOLMITRIPTAN, PMS-ZOLMITRIPTAN ODT – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- PRAMIPEXOLE (SANIS) – 0.25, 0.5, 1 and 1.5 mg Tablets – For treatment of idiopathic Parkinson's Disease.
- PROBUPHINE – 80 mg Subcutaneous implant – For the management of opioid dependence in patients clinically stabilized on no more than 8 mg of sublingual (SL) buprenorphine in combination with counselling and psycho-social support, if the following criteria and conditions are met:

Criteria:

- Stabilized on a dose of no more than 8 mg per day of SL buprenorphine for the preceding 90 days.

Conditions:

- Patient under the care of a health care provider with experience in the diagnosis and management of opioid use disorder and who has been trained to insert and remove the buprenorphine subdermal implant.

- PROSCAR – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- RAN-CLARITHROMYCIN – 250 and 500 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H.Pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- RELENZA – 5 mg Blister Dry Powder for oral inhalation –
 - (a) for the treatment of patients who show influenza-like illness and meet one or more of the following risk factors:
 - (i) persons 65 years of age or older,
 - (ii) persons under 65 years of age who are frail, have mobility problems or live alone,
 - (iii) persons with chronic diseases (e.g. lung disease including asthma, heart disease, kidney disease, central nervous system diseases including neuromuscular diseases, endocrine system diseases including diabetes mellitus),
 - (iv) persons with immune disorders or immunosuppression (e.g. cancer patients on treatment, patients with autoimmune diseases or rheumatologic diseases on TNF inhibitors or corticosteroids, transplant patients, patients with HIV infection),
 - (v) children younger than 19 years of age having conditions treated with long-term acetylsalicylic acid (ASA),
 - (vi) persons who are malnourished or severely obese,
 - (vii) persons with other conditions (e.g. smoking, substance abuse, alcoholism, homelessness) that may increase the risk of complications from influenza or be associated with delays in seeking or receiving care for mild or severe influenza-like illness,
 - (viii) persons of aboriginal ancestry,
 - (ix) pregnant women and women within six weeks postpartum;
 - (b) for preventive or chemoprophylactic purposes for persons who are severely immunocompromised and have a history of contact with a person with suspected or confirmed pandemic H1N1 virus.

NOTE: For Relenza to be effective as a treatment, it should be administered as early as possible and preferably within 48 hours of onset of illness. For chemoprophylactic use, Relenza should be used within 48 hours of exposure to pandemic H1N1 influenza.

- RIVA-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);

- (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- RIVA-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
 - RIZATRIPTAN (SANIS) – 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - RIZATRIPTAN ODT (SANIS) – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - RIZATRIPTAN ODT (SIVEM) – 5 AND 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - ROCALTROL – 0.25 and 0.5 ug Capsules – The management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism, and Vitamin D resistant rickets.
 - SAIZEN – 5 mg/vial and 6, 12 and 20 mg cartridge Injections –
 - (a) For the long term management of children who have growth failure due to an inadequate secretion of normal endogenous growth hormone;
 - (b) For the treatment of children who have growth failure associated with chronic renal failure insufficiency up to the time of renal transplant;
 - (c) For treatment of short stature associated with Turner Syndrome in patients whose epiphyses are not closed.
- NOTE: Use the appropriate vial strength, based on the weight of the patient, in order to avoid wastage.
- SANDOZ ALFACALCIDOL – 0.25 and 1.0 ug Capsules and 0.2 ug/ml Solution – For the management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism, and Vitamin D resistant rickets.
 - SANDOZ AMOXI-CLAV TABLETS – 500/125 and 875/125 mg Tablets –
 - a) For treatment of patients not responding to alternative antibiotics (eg. amoxicillin);
 - b) For treatment of patients with infections caused by organisms known to be resistant to alternative (eg. amoxicillin).
 - SANDOZ AZITHROMYCIN – 100 mg/5 mL and 200 mg/5 mL Oral Suspension – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.

- SANDOZ AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) with sexually transmitted disease due to Chlamydia;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- SANDOZ CIPROFLOXACIN – 0.3% Ophthalmic Solution – For the treatment of ophthalmic infections caused by gram-negative organisms or those not responding to alternative agents.
- SANDOZ CIPROFLOXACIN – 250, 500 and 750 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of pseudomonal infections or resistant gram-negative infections;
 - (c) Treatment of resistant gonococcal infections;
 - (d) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (e) Treatment of infections in immunocompromised patients;
 - (f) Treatment of diabetic foot infections and complications of orthopedic surgery;
 - (g) Treatment of chronic bacterial prostatitis.
- SANDOZ CLARITHROMYCIN – 250 and 500 mg Tablets – For treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- SANDOZ DUTASTERIDE – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- SANDOZ ESTRADIOL DERM – 50, 75 and 100 mcg Transdermal Patch – For patients:
 - (a) who are smokers (current);
 - (b) with increased triglycerides;
 - (c) with a history of cholelithiasis; or
 - (d) who cannot tolerate oral estrogens due to intolerable side effects (eg. GI upset, irregular bleeding, etc.) or who cannot take any medications by mouth.

Patients should have tried at least two different oral estrogen products (eg. Premarin, Estrace, Ogen).

- SANDOZ FENTANYL – 12, 25, 50, 75 and 100 mcg Patches – For the treatment of pain in patients unable to tolerate analgesics or when there is failure to adequately control pain with oral analgesics or in patients for whom oral analgesics are deemed inappropriate.
- SANDOZ FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.
- SANDOZ LEVOFLOXACIN – 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of gram-negative infections resistant to standard therapy;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of bacterial prostatitis;
 - (e) Treatment of respiratory infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides;
 - (f) Treatment of diabetic foot infections;
 - (g) Treatment of community acquired pneumonia with co-morbid illness or failure of first-line therapy;
 - (h) Treatment of pneumonia in long-term care patients.
- SANDOZ MONTELUKAST – 4 mg Granules –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) Maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) Evidence of serious adverse effects associated with corticosteroids exists. eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- SANDOZ MONTELUKAST – 4, 5 and 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;
 - (b) Indicated as first line therapy for exercise induced asthma.
- SANDOZ MOXIFLOXACIN – 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with parenteral antibiotics;
 - (b) Treatment of resistant gram-positive or gram-negative infections;
 - (c) Treatment of infections in persons allergic to alternative agents (eg. penicillins, cephalosporins and sulfonamides);
 - (d) Treatment of infections in patients failing or likely to fail or intolerant of penicillins, cephalosporins and/or macrolides.
- SANDOZ NARATRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where

standard therapy has failed – to a maximum of 144 tablets per benefit year.

- SANDOZ PRAMIPEXOLE – 0.25, 0.5, 1 and 1.5 mg Tablets – For treatment of idiopathic Parkinson's Disease.
- SANDOZ RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- SAB-TOBRAMYCIN – 3 mg/mL Ophthalmic Solution – For treatment of highly suspected or proven pseudomonal ophthalmic infections.
- SANDOZ ZOLMITRIPTAN, SANDOZ ZOLMITRIPTAN ODT – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- SEPTA-ZOLMATRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- SINGULAIR – 4 and 5 mg Chewable Tablets, 10 mg Film Coated Tablets and 4 mg Oral Granules

(a) Indicated as adjunctive therapy for asthma in cases where:

- (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
- (ii) evidence of serious adverse effects associated with corticosteroids exists, eg. adrenal suppression, increased lung infections;

(b) Indicated as first line therapy for exercise induced asthma.

- SPORANOX – 100 mg Capsules – For the prophylaxis and treatment of

(a) onychomycosis, oropharyngeal and esophageal candidiasis in immunocompromised patients; and

(b) systemic fungal infections other than oropharyngeal candidiasis.

- SUBLOCADE – 100 mg/0.5 mL and 300 mg/1.5 mL subcutaneous Injection – For the management of moderate to severe opioid use disorder in adult patients who have been inducted and clinically stabilized on a transmucosal buprenorphine-containing product, if the following criteria and conditions are met:

Criteria:

- Patients must be induced and stabilized on an equivalent of 8 mg to 24 mg per day of transmucosal buprenorphine for a minimum of 7 days.

Conditions:

- Patients are under the care of a health care provider with experience in the diagnosis and management of opioid use disorder and who has been trained to administer the buprenorphine extended-release injection.
- Buprenorphine extended-release injection should be used as part of a complete treatment plan that includes counselling and psychosocial support.
- Buprenorphine extended-release injection must be administered subcutaneously in the abdominal region by a health care provider.

- SUMATRIPTAN (SANIS) – 50 and 100 mg Tablets – For the treatment of acute migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- SUMATRIPTAN DF (SIVEM) – 50 and 100 mg Tablets – For the treatment of acute migraine attacks in patients where standard therapy has failed - to a maximum of 144 tablets per benefit year.
- SUMATRIPTAN (SIVEM) – 50 and 100 mg Tablets – For the treatment of acute migraine attacks in patients where

standard therapy has failed - to a maximum of 144 tablets per benefit year.

- SUPRAX – 20 mg/mL Suspension and 400 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- SUPREFACT – 1 mg/mL subcutaneous and intranasal and 6.3 and 9.45 mg Depot – For the treatment of gynecological disorders excepting fertility disorders.
- SYNAREL – 2 mg/mL Nasal Spray – For hormonal management of endometriosis.
- TAMIFLU – 30, 45 and 75 mg Capsules and 6 mg/mL Oral Suspension – For the treatment OR prevention of Influenza in persons who meet one or more of the following risk factors:
 - (a) asthma or other chronic pulmonary disease, including bronchopulmonary dysplasia, cystic fibrosis, chronic bronchitis and emphysema;
 - (b) cardiovascular disease (excluding isolated hypertension), including congenital and acquired heart disease such as congestive heart failure, and symptomatic coronary artery disease;
 - (c) malignancy;
 - (d) chronic renal insufficiency;
 - (e) chronic liver disease;
 - (f) diabetes mellitus or other metabolic diseases;
 - (g) hemoglobinopathies such as sickle cell disease;
 - (h) immunosuppression or immunodeficiency due to disease (eg. HIV infection, or iatrogenic due to medication);
 - (i) rheumatologic diseases, including rheumatoid arthritis, systemic lupus erythematosus, psoriatic arthritis, antiphospholipid syndrome, scleroderma, spondyloarthropathies, Sjorgen's syndrome, dermatomyositis, vasculitis, sarcoidosis and polyarteritis nodosa;
 - (j) neurological disease or neurodevelopmental disorders that compromise handling of respiratory secretions (eg. cognitive dysfunction, spinal cord injury, seizure disorders, neuromuscular disorders, cerebral palsy, metabolic disorders);
 - (k) children younger than 2 years of age;
 - (l) individuals 65 years of age or older;
 - (m) individuals of any age who are residents of nursing homes or other chronic care facilities;
 - (n) pregnant women and women up to 2 weeks post partum regardless of how the pregnancy ended;
 - (o) individuals younger than 18 years of age who are on chronic aspirin therapy;
 - (p) morbid obesity (BMI 40 or greater);
 - (q) persons of aboriginal ancestry, including Indian, Inuit or Metis ancestry;

- (r) persons exposed to avian influenza.
- TARO-CALCITRIOL – 0.25 and 0.5 mcg Capsules – For the management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing dialysis and in the management of hypocalcemia in clinical manifestations associated with post surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism and Vitamin D-resistant rickets.
- TARO-CEFPROZIL – 125 mg/5 mL and 250 mg/5 mL Powder for Suspension and 250 and 500 mg Tablets –
 - (a) Step-down care following hospital separation in patients treated with intravenous cephalosporins;
 - (b) Treatment of patients with infections not responding to alternative antibiotics (eg. amoxicillin);
 - (c) Treatment of infections caused by organisms known to be resistant to alternative antibiotics (eg. amoxicillin);
 - (d) Treatment of patients known to be allergic or unresponsive to alternative antibiotics (eg. penicillin or sulfonamides).
- TARO-CLARITHROMYCIN – 125 mg/5 mL and 250 mg/5 mL Powder for suspension – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. Pylori;
 - (d) with pneumonia; or
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- TARO-MONTELUKAST – 10 mg Tablets –
 - (a) Indicated as adjunctive therapy for asthma in cases where:
 - (i) maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or
 - (ii) evidence of serious adverse effects associated with corticosteroids exists (eg. adrenal suppression, increased lung infections);
 - (b) Indicated as first line therapy for exercise induced asthma.
- TARO-TICAGRELOR – 90 mg Tablets – For the treatment of patients with:
 - (a) Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis, or recurrent STEMI, NSTEMI or UA after prior revascularization via percutaneous coronary intervention (PCI); or
 - (b) STEMI and undergoing revascularization via PCI; or
 - (c) NSTEMI, UA or high risk angiographic anatomy and undergoing revascularization via PCI.

Treatment must be initiated in-hospital and prescribed by a specialist with experience in managing acute coronary syndrome (ACS).
- TARO-TOFACITINIB – 5 & 10 mg Tablets –
 - (a) For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:
 - (i) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented.

(ii) tried one combination therapy of DMARDS, and

(iii) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or the C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed

(b) For the treatment of patients 18 years of age or older with moderate to severe active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

NOTE: Coverage will be provided only if prescribed by a specialist in gastroenterology

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed

– TEVA-AZITHROMYCIN – 250 mg Tablets – For the treatment of patients:

(a) not responding to or intolerant to alternative antibiotics (e.g. amoxicillin and erythromycin);

(b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;

(c) with sexually transmitted disease due to Chlamydia;

(d) with pneumonia;

(e) with infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.

– TEVA-CYCLOBENZAPRINE – 10 mg Tablets – As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions not responding to alternative therapy. Coverage will be provided for up to 126 tablets per benefit year.

– TEVA-DUTASTERIDE – 0.5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.

– TEVA-FENTANYL – 12, 25, 50, 75 and 100 mcg Transdermal Patch – For the treatment of pain in patients unable to tolerate oral analgesics or when there is failure to adequately control pain with oral analgesics or in patients in whom oral analgesics are deemed inappropriate.

– TEVA-FINASTERIDE – 5 mg Tablets – For the treatment of symptomatic benign prostatic hyperplasia.

– TEVA-FLUCONAZOLE – 50 and 100 mg Tablets – For the prophylaxis and treatment of

(a) oropharyngeal and esophageal candidiasis in immunocompromised patients; and

(b) systemic fungal infections other than oropharyngeal candidiasis.

– TEVA-MONTELUKAST – 4, 5 and 10 mg Tablets –

(a) Indicated as adjunctive therapy for asthma in cases where:

(i) Maximum doses of inhaled corticosteroids have not effectively controlled symptoms, or

(ii) Evidence of serious adverse effects associated with corticosteroids exists. eg. adrenal suppression, increased lung infections;

(b) Indicated as first line therapy for exercise induced asthma.

– TEVA-NARATRIPTAN – 1 and 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where

standard therapy has failed – to a maximum of 144 tablets per benefit year.

- TEVA-RIZATRIPTAN ODT – 5 and 10 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- TEVA-SUMATRIPTAN – 100 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- TEVA-SUMATRIPTAN DF – 50 and 100 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- TEVA-ZOLMITRIPTAN – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- TEVA-ZOLMITRIPTAN OD – 2.5 mg Orally Disintegrating Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
- TOBRADEX – 0.3%/0.1% Ophthalmic Suspension and Ointment – For treatment of ophthalmic infections not responding to therapeutic alternatives.
- TOBREX – 3 mg/mL Ophthalmic Solution and 3mg/gm ophthalmic ointment – For treatment of highly suspected or proven pseudomonal ophthalmic infections.
- VANCOCIN – 125 and 250 mg Capsules – For treatment of pseudomembranous colitis unresponsive to metronidazole.
- VRAYLAR – 1.5, 3, 4.5 and 6 MG Capsules – For the treatment of schizophrenia.
- XELJANZ – 5 mg & 10mg Tablets –

(a) For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have

- (i) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented.
- (ii) tried one combination therapy of DMARDs; and
- (iii) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

(b) For the treatment of patients 18 years of age or older with moderate to severe active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy, including 5-aminosalicylate compounds AND corticosteroids.

NOTE: Coverage will be provided only if prescribed by a specialist in gastroenterology.

Combined use with other biologic drugs or Janus Kinase (JAK) inhibitors will not be reimbursed.

- ZADITEN – 1 mg Tablets – For treatment of pediatric patients with asthma who are unresponsive to or unable to administer alternative prophylactic agents listed in the Formulary.
- ZITHROMAX – 250 mg Tablets – For treatment of patients:
 - (a) Not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) With mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;

- (c) With sexually transmitted diseases due to Chlamydia;
 - (d) With pneumonia;
 - (e) With infections requiring a macrolide (including CAP in patients 65 and older) with documented intolerance to erythromycin.
- ZITHROMAX – 600 mg Tablets – For the treatment of patients with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare.
 - ZITHROMAX POS – 20 and 40 mg/mL – For the treatment of patients:
 - (a) not responding to or intolerant of alternative antibiotics (eg. amoxicillin and erythromycin);
 - (b) with mycobacterial infections due to mycobacterium avium and mycobacterium intracellulare;
 - (c) in combination therapy in the treatment of H. pylori;
 - (d) with pneumonia;
 - (e) with infections requiring a macrolide (including CAP in patients 65 and older with documented intolerance to erythromycin).
 - ZOLADEX – 10.8 mg Depot – For the treatment of gynecological disorders excepting fertility disorders.
 - ZOLADEX – 3.6 mg Injection – For the treatment of:
 - (a) gynecological disorders excepting fertility disorders;
 - (b) for the palliative treatment of advanced breast cancer in pre- and perimenopausal women whose tumor contains estrogen and/or progesterone receptors.
 - ZOLMITRIPTAN (SANIS) – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - ZOLMITRIPTAN ODT (SANIS) – 2.5 mg Tablets – For the treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.
 - ZOMIG – 5 mg Nasal spray – For treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 sprays per benefit year.
 - ZOMIG, ZOMIG RAPIMELT – 2.5 mg Tablets – For treatment of ACUTE migraine attacks in patients where standard therapy has failed – to a maximum of 144 tablets per benefit year.

DRUGS PROVIDED AT NO COST

HIV MEDICATIONS

PART 1

Any one of the following:

- 3TC – 150 AND 300 MG TABLETS, AND 10MG/ML SOLUTION
- APO-ABACAVIR – 300 MG TABLETS
- APO-ABACAVIR-LAMIVUDINE – 600/300 MG TABLETS
- APO-DARUNAVIR – 600 AND 800 MG TABLETS
- APO-LAMIVUDINE – 150 AND 300 MG TABLETS
- APO-LAMIVUDINE HBV – 100 MG TABLETS
- APO-LAMIVUDINE/ZIDOVUDINE – 150/300 MG TABLETS
- APO-ZIDOVUDINE – 100 MG CAPSULES
- AURO-ABACAVIR/LAMIVUDINE – 600/300 MG TABLETS
- AURO-DARUNAVIR – 600 AND 800 MG TABLETS
- AURO-EFAVIRENZ – 600 MG TABLETS
- AURO-LAMIVUDINE/ZIDOVUDINE – 150/300 MG TABLETS
- AURO-NEVIRAPINE – 200 MG TABLETS
- COMBIVIR – 150/300 MG TABLETS
- JAMP ABACAVIR/LAMIVUDINE – 600/300 MG TABLETS
- JAMP-ATAZANAVIR - 150, 200, AND 300MG CAPSULES
- DARUNAVIR (JAMP) – 600 AND 800 MG TABLETS
- JAMP-EFAVIRENZ – 600 MG TABLETS
- JAMP LAMIVUDINE – 150 AND 300 MG TABLETS
- JAMP LAMIVUDINE HBV – 100 MG TABLETS
- JAMP LAMIVUDINE/ZIDOVUDINE – 150/300 MG TABLETS
- JAMP NEVIRAPINE – 200 MG TABLETS
- KALETRA – 80/20 MG/ML ORAL SOLUTION
- KALETRA – 100 MG/25 MG TABLETS
- KALETRA – 200 MG/50 MG TABLETS
- KIVEXA – 600/300 MG TABLETS
- MINT-ABACAVIR – 300 MG TABLETS
- MYLAN-ABACAVIR/LAMIVUDINE – 600/300 MG TABLETS
- MYLAN-ATAZANAVIR – 150, 200 AND 300 MG TABLETS
- MYLAN-EFAVIRENZ – 600 MG TABLETS
- MYLAN-NEVIRAPINE – 200 MG TABLETS
- NORVIR – 100 MG TABLETS
- PMS-ABACAVIR/LAMIVUDINE – 600/300 MG TABLETS
- PREZISTA – 800 MG TABLETS
- RETROVIR SYRUP AND INJECTION
- REYATAZ – 200 AND 300 MG TABLETS
- TELZIR – 700 MG TABLETS
- TEVA-ABACAVIR/LAMIVUDINE – 600/300 MG TABLETS
- TEVA-ATAZANAVIR – 150, 200 AND 300 MG CAPSULES
- TEVA-EFAVINREZ – 600 MG TABLETS
- VIRACEPT – 250 MG TABLETS
- ZIAGEN – 20 MG/ML ORAL SOLUTION

PART 2

Any one of the following for the length of time and conditions specified:

- AG-EMTRICITABINE/TENOFOVIR DISOPROXIL FUMARATE– 200 mg/300 mg Tablets – ;
- APO-EMTRICITABINE/TENOFOVIR –200 mg/300 mg Tablets – ;
- AURO-EMTRICITABINE/TENOFOVIR –200 mg/300 mg Tablets – ;
- JAMP-EMTRICITABINE/TENOFOVIR DISOPROXIL FUMARATE– 200 mg/300 mg Tablets
- MINT-EMTRICITABINE/TENOFOVIR – 200 mg/300 mg Tablets –;
- MYLAN-EMTRICITABINE/TENOFOVIR DISOPROXIL FUMARATE – 200 mg/300 mg Tablets – ;
- PMS-EMTRICITABINE/TENOFOVIR – 200 mg/300 mg Tablets – ;
- TEVAEMTRICITABINE/TENOFOVIR – 200 mg/300 mg Tablets – ;
- TRUVADA – 200 mg/300 mg Tablets –

(a) For patients requiring post-exposure prophylaxis (PEP) to prevent infection subsequent to exposure to human blood and body fluids that may transmit human immunodeficiency virus (HIV), up to a maximum of 28 days;

(b) For the treatment as a dual nucleoside (nucleotide) option for treatment of HIV patients where the virus is susceptible to both these agents and efavirenz is not indicated due to adverse effects or antiretroviral resistance.

(c) For use as pre-exposure prophylaxis (PrEP) of human immunodeficiency virus type 1 (HIV-1) in combination with safer sex practices to reduce the risk of sexually acquired HIV-1 infection in adults that are HIV-negative and at high risk for infection, if provided in the context of a sexual health program by a prescriber experienced in the treatment and prevention of HIV-1 infection.

Inclusion Criteria:

1. Men Who Have Sex with Men (MSM), Trans Women and Gender Diverse People
 - Condomless anal sex within the last 6 months and any of:
 - Infectious syphilis or bacterial STI (gonorrhea or chlamydia) in the past 12 months
 - nPEP (non-occupational HIV post-exposure prophylaxis) more than once
 - Ongoing sexual relationship with HIV-positive partner(s) with substantial risk of transmissible HIV (e.g. viral load >40 copies/mL) or HIV status unknown but from a higher risk population, e.g. MSM, persons who inject drugs (PWID))
 - HIRI-MSM risk score ≥ 11
2. Heterosexual People
 - Recommended for the HIV-negative person with ongoing exposure to HIV-positive partner(s) involving condomless vaginal or anal sex, where the HIV-positive partner(s) has a substantial risk of having transmissible HIV (i.e. not on or not adherent to antiretroviral treatment)
 - Consider PrEP for the HIV-negative person in similar situations where the HIV-positive partner(s) has a lower, but non-negligible risk of transmissible HIV:
 - viral load detectable (>40 copies/mL) or
 - viral load usually undetectable (2 sequential measurements of HIV viral load ≤ 40 copies/ml as the result on at least 2 occasions separated in time by 4 to 6 months) but concomitant STI present at time of exposure or
 - HIV status unknown, but from a high-prevalence population - MSM, PWID, countries with high HIV prevalence
3. People Who Inject Drugs (PWID)
 - PrEP may be considered when there is ongoing or anticipation of ongoing sharing of injection drug use paraphernalia (needles, syringes, spoons, foil, cotton filters etc.) with a person with a non-negligible risk of HIV infection:
 - Detectable viral load or
 - HIV status unknown but from a high-prevalence population - MSM, PWID, countries with a high HIV prevalence.

Exclusion Criteria

- Not indicated for those in a monogamous relationship with a single partner with no or negligible risk of having transmissible HIV (e.g. HIV negative, HIV positive but virus suppressed with viral load ≤ 40 copies/mL, or HIV status unknown but risk profile similar to the general population).

- ISENTRESS – 400 mg Tablets –
 - (a) For patients requiring post-exposure prophylaxis (PEP) to prevent infection subsequent to exposure to human blood and body fluids that may transmit human immunodeficiency virus (HIV), up to a maximum of 28 days;
 - (b) For the treatment of HIV infection in patients who are antiviral experienced and have had virologic failure due to resistance to at least one agent from each of the three major antiretroviral classes.

CONTRACEPTIVES

PART 1

Any one of the following:

- ALESSE 21 – 20/100 MCG TABLETS
- ALESSE 28 – 20/100 MCG TABLETS
- ALYSENA 21 – 20/100 MCG TABLETS
- ALYSENA 28 – 20/100 MCG TABLETS
- APRI 21 – 0.15/0.03 MG TABLETS
- APRI 28 – 0.15/0.03 MG TABLETS
- AUDRINA 21 – 20/100 MCG TABLETS
- AUDRINA 28 – 20/100 MCG TABLETS
- AVIANE 21 – 20/100 MCG TABLETS
- AVIANE 28 – 20/100 MCG TABLETS
- BREVICON 0.5/35 (21) – 0.035/0.5 MG TABLETS
- BREVICON 0.5/35 (28) – 0.035/0.5 MG TABLETS
- BREVICON 1/35 (21) – 0.035/1 MG TABLETS
- BREVICON 1/35 (28) – 0.035/1 MG TABLETS
- DEPO-PROVERA – 150 MG/ML SUSPENSION FOR INJECITON
- DROSPIRENONE AND ETHINYL ESTRADIOL TABLETS – 3/0.02 MG TABLETS
- DROSPIRENONE AND ETHINYL ESTRADIOL TABLETS 21 – 3/0.03 MG TABLETS
- DROSPIRENONE AND ETHINYL ESTRADIOL TABLETS 28 – 3/0.03 MG TABLETS
- FREYA 21 – 0.15/0.03 MG TABLETS
- FREYA 28 – 0.15/0.03 MG TABLETS
- JENCYCLA – 0.35 MG TABLETS
- KYLEENA – 19.5 MG INTERUTERINE DEVICE
- LINESSA 21 – 0.1/0.125/0.15/0.025 MG TABLETS
- LINESSA 28 – 0.1/0.125/0.15/0.025 MG TABLETS
- LOLO – 10/10/MCG/1 MG TABLETS
- MARVELON 21 – 0.15/0.03 MG TABLETS
- MARVELON 28 – 0.15/0.03 MG TABLETS
- MIN-OVRAL 21 – 30/150 MCG TABLETS
- MIN-OVRAL 28 – 30/150 MCG TABLETS
- MIRENA – 52 MG INTERUTERINE IMPLANT
- MIRVALA 21 – 0.15/0.03 MG TABLETS
- MIRVALA 28 – 0.15/0.03 MG TABLETS
- MOVISSE – 0.35 MG TABLETS
- MYA – 3/0.02 MG TABLETS
- NEXPLANON – 68 MG HORMONAL IMPLANT
- OVIMA 21 – 30/150 MCG TABLETS
- OVIMA 28 – 30/150 MCG TABLETS
- PORTIA 21 – 0.03/0.15 MG TABLETS
- PORTIA 28 – 0.03/0.15 MG TABLETS
- SELSECT 1/35 (21) – 0.035/1 MG TABLETS

- SELSECT 1/35 (28) – 0.035/1 MG TABLETS
- SLYND – 4 MG TABLETS
- SYNPHASIC 21 – 0.035/0.5/1 MG TABLETS
- SYNPHASIC 28 – 0.035/0.5/1 MG TABLETS
- TRI-CIRA 21 – 0.035/0.18/0.215/0.25 MG TABLETS
- TRI-CIRA 28 – 0.035/0.18/0.215/0.25 MG TABLETS
- TRI-CIRA LO 21 – 0.025/0.18/0.215/0.25 MG TABLETS
- TRI-CIRA LO 28 – 0.025/0.18/0.215/0.25 MG TABLETS
- TRI-JORDYNA 21 – 0.035/0.18/0.215/0.25 MG TABLETS
- TRI-JORDYNA 28 – 0.035/0.18/0.215/0.25 MG TABLETS
- TRIQUILAR 21 – 30/40/125/50/75 MCG TABLETS
- TRIQUILAR 28 – 30/40/125/50/75 MCG TABLETS
- YASMIN 21 – 3/0.03 MG TABLETS
- YASMIN 28 – 3/0.03 MG TABLETS
- YAZ – 3/0.02 MG TABLETS
- ZAMINE 21 – 3/0.03 MG TABLETS
- ZAMINE 28 – 3/0.03 MG TABLETS

COVID-19 TREATMENT

PART 2

Any one of the following for the length of time and conditions specified:

- PAXLOVID – 150/100 MG CO-PACKAGE TABLETS

For the treatment of moderately or severely immunosuppressed adult patients diagnosed with COVID-19 infection. Paxlovid MUST be initiated within 5 days of symptom onset.

Examples of severe immunosuppression may include:

- Solid organ transplant recipients
- Treatment for malignant hematologic conditions
- Bone marrow transplant, stem cell transplant or transplant-related immunosuppressant use
- Treatment with anti-CD20 agents or B-cell depleting agents (such as rituximab) in the past 2 years
- Severe primary immunodeficiencies^a

Examples of moderate immunosuppression may include:

- Treatment for cancer, including solid tumors
- Treatment with drugs that are significantly immunosuppressive^b
- Advanced HIV infection (treated or untreated)
- Moderate primary immunodeficiencies^c
- Renal conditions (i.e., hemodialysis, peritoneal dialysis, glomerulonephritis and dispensing of a steroid, eGFR < 15 mL/min/1.73 m²)

^aIncludes combined immunodeficiencies affecting T cells, immune dysregulation (particularly familial hemophagocytic lymphohistiocytosis), or type 1 interferon defects (caused by a genetic primary immunodeficiency disorder or secondary to anti-interferon autoantibodies).

^bIncludes a biologic or immune-suppressing infusion or injection in the past 3 months, oral immune-suppressing medication in the past months, oral steroid (20 mg/day of prednisone equivalent taken on an ongoing basis) in the past month.

^cIncludes a primary immunodeficiency with a genetic cause at any time, or a primary immunodeficiency with immunoglobulin replacement therapy in the past year.
