

Information for Pharmacists

**Claims Submission Procedure –
Blood Glucose Test Strips (BGTS)
Effective March 14, 2023
Updated November 7, 2024**

Please include this Procedure in your Drug Programs Information Network (DPIN) Manual under Section 4: Claims Submission.

- Effective **March 14, 2023**, the annual approved quantity of BGTS by treatment regimen will be updated to include clients who use Advance Glucose Monitors (AGM), which includes both Continuous Glucose Monitors (CGM) and Flash Glucose Monitors (FGM), and the following treatment regimens and quantity limits will come into effect:

Treatment Regimen	Approved Quantity per Benefit Year
Clients managing diabetes with insulin	
Managing diabetes with insulin and <u>not</u> using AGM (FGM or CGM)	3,650 strips
Managing diabetes with insulin <u>and</u> using Medtronic CGM*	1,600 strips
Managing diabetes with insulin <u>and</u> using Freestyle Libre FGM, Freestyle Libre 2 FGM, or Dexcom CGM	200 strips
Clients NOT managing diabetes with insulin	
Managing diabetes with medication with a higher risk of causing low blood sugar	400 strips
Managing diabetes with medication with a lower risk of causing low blood sugar	200 strips
Managing diabetes through diet/lifestyle therapy	200 strips

****additional BGTS are required for calibration of this system***

- The PIN selected for a claim must be specific to both the treatment regimen applicable to the client and the product being dispensed. The BGTS PINs are listed on page 2.
- When a claim is submitted, the pharmacist should verify against DPIN prescription history the treatment regimen applicable to the client in order to select the appropriate PIN. If a client’s treatment regimen changes, the pharmacist should document the change (for auditing purposes), and update the PIN. The benefit limit will be altered automatically.
- These PINs will accumulate towards the client’s existing BGTS quantity accumulation for the current 2022/23 benefit year (i.e., if a client has already reached the maximum approved quantity this benefit year they will NOT be eligible for additional BGTS).
- The quantity indicated in a BGTS claim must continue to reflect the number of BGTS dispensed, NOT the number of boxes dispensed.

- The update to the approved quantity per benefit year of BGTS by treatment regimen was announced in Bulletin 125 found here: <http://www.gov.mb.ca/health/mdbif/bulletin125.pdf>).

If your questions are not answered by reviewing the Claims Submission Procedures and FAQs posted at: <https://www.gov.mb.ca/health/pharmacare/healthprofessionals.html>

Please send an e-mail to PDPIInfoAudit@gov.mb.ca.

Clients managing diabetes with insulin

**Treatment Regimen:
Managing diabetes with insulin
and
NOT using AGM (FGM or CGM)**

This higher limit applies whether or not the patient
is also taking other diabetes medications

**Approved quantity:
3,650 strips per benefit year**

Product Name (Quantity)	PIN
Accu-Chek Aviva (3650)	00903650
Accu-Chek Compact (3650)	00913650
