# Introduction

Throughout history, generations of immigrants have arrived in Manitoba to start a new life. Their presence is celebrated in our communities. Many new immigrants, and a large number of Manitoban-born people, continue to identify strong ethnic ties outside of Canada. This extended, renewed sense of belonging promotes cultural and ethnic diversity in our province.

Ethnicity is a complex phenomenon. This series of publications helps to capture part of that complexity by outlining essential demographic dimensions of this phenomenon in recent years. Based on selected socio-demographic characteristics, such as country of birth, mother tongue, population group and ethnic origins, taken from the 2001 and 2006 Canadian census, the series shows recent trends in Manitoba's regions as well as Winnipeg's community areas.

**The ethnicity series is made up of three volumes:**

## 1. Foreign-born Population

This volume presents the population by country of birth. It focuses on the foreign-born population and its recent regional distribution across Manitoba. Counted every census year, the foreign-born population is considered as the immigrant population.

## 2. Population by Mother Tongue

This volume presents the mother tongues of Manitobans, regardless of immigrant status. It focuses on the non-official foreign languages in Manitoba's regions.

## 3. Population Groups and Ethnic Origins

This volume consists of two parts. The first presents Manitoba's population groups according to visible and non-visible minority self-identification, regardless of immigrant status. It presents, in detail, the various visible minority groups in Manitoba. The second part shows the census responses of Manitobans – regardless of their immigrant status or ethnic origins.

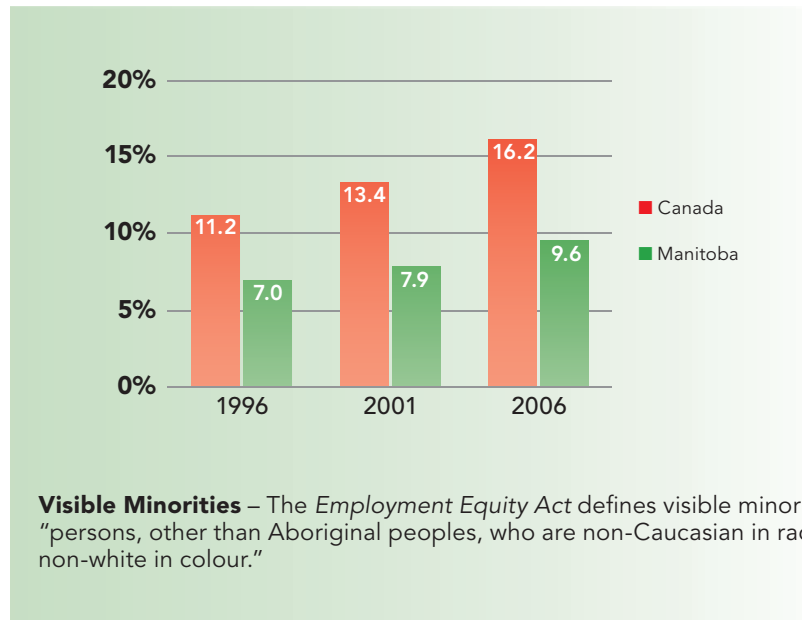

# Canada's Population Groups

According to Statistics Canada, the question on population groups is used to produce two variables: population groups and visible minority groups. It was asked for the first time in the 1996 Canadian Census. In 1986 and 1991, data on visible minorities came from responses to the ethnic origin question, together with other ethno-cultural information (ex: language, place of birth, religion). The concept of visible minorities is defined in the *Employment Equity Act* as "persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour."

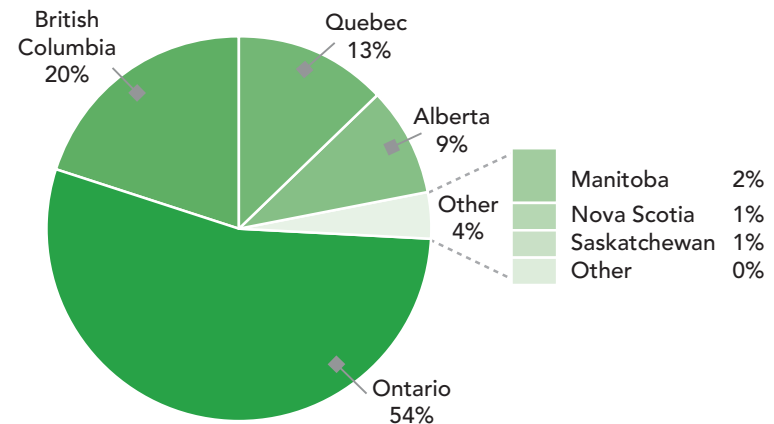

In 2006, the census enumerated an estimated 5,068,095 individuals who belonged to the visible minority population. They made up 16.2 per cent of Canada's total population. About 90 per cent of them resided in three provinces: Ontario (54.2 per cent), British Columbia (19.9 per cent) and Quebec (12.9 per cent).

In 2006, 109,095 Manitobans identified themselves as visible minorities (9.6 per cent of the provincial population). This represents an increase of 31,740 individuals (41 per cent) over 1996.

## Visible Minorities

## Canada: Visible Minorities by Province – 2006

# Manitoba's Population Groups

In 2006, Manitoba was home to 109,095 people belonging to visible minorities. Three groups accounted for 64 per cent of the visible minorities in the province: Filipinos (34.6 per cent), South Asians (15.2 per cent) and Blacks (14.3 per cent).

# Ethnic Origins

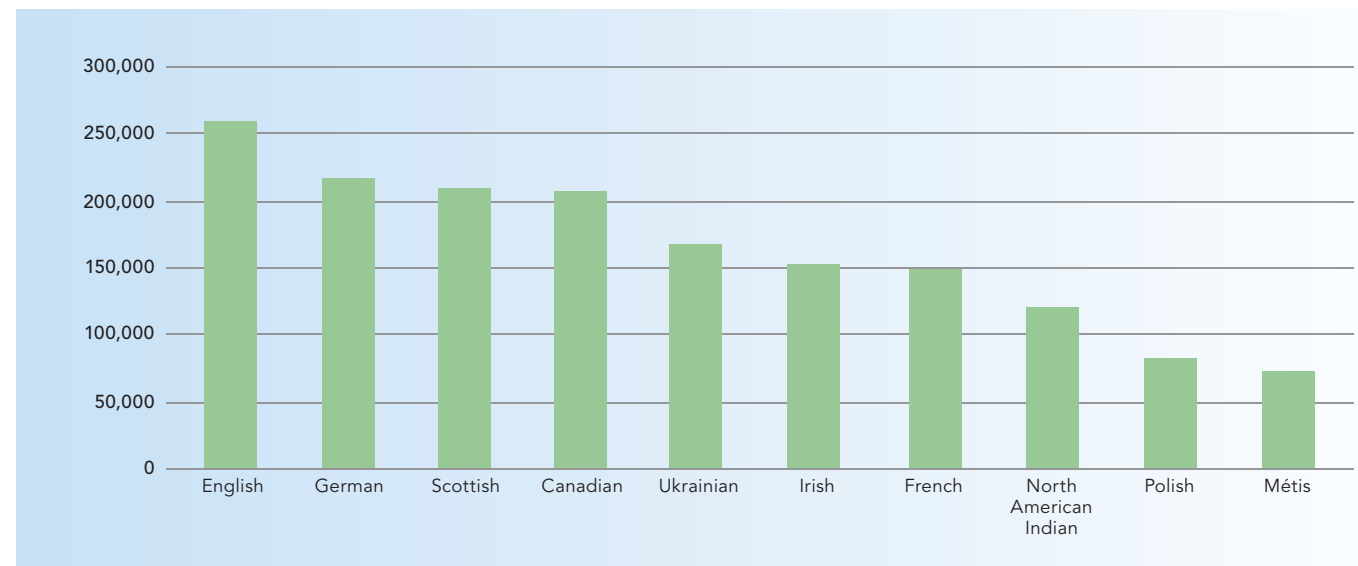

In Canada, more than 200 ethnic origins\* were reported by the population in 2006. Back in 1901, the census recorded about 25 different ethnic groups in the country. In 2006, the origins most often reported were Canadian, English, French, Scottish and Irish.

Similarly, more than 200 ethnic origins were reported by Manitobans in the 2006 Census. English, German, Scottish, Canadian and Ukrainian were the ancestries with the highest reported numbers in the province.

**Canada: Top Ethnic Origins Reported – 2006**

**Manitoba: Top Ethnic Origins Reported – 2006**

**Ethnic origins** – refer to the ethnic or cultural origins of the respondent's ancestors. An ancestor is someone from whom a person is descended, and is usually more distant than a grandparent. Because some respondents reported more than one ethnic origin, the sum of the total responses is greater than the total population, or 100 per cent.

*\*In this document, ethnic origins refer to the total responses (single and multiple).*

# Manitoba Regions

## Population Groups

In 2006, the Winnipeg region was home to the majority of the visible minority population (94 per cent) in Manitoba. About six per cent of this population lived in other regions.

The Black population was the largest visible minority in the Central and Eastern regions; Filipinos in the Interlake and Winnipeg regions; South Asians in the Norman region; Chinese in the Parklands; and Latin Americans in the Western region.

## Visible Minorities – 2006

## Manitoba's Visible Minorities – 2006

## Ethnic Origins

In 2006, English was the top ethnic origin reported in the Interlake, Western and Winnipeg regions; German, in the Central and Eastern regions; North American Indian in the Norman region; and Ukrainian in the Parklands region.

### Manitoba Regions: Top Ethnic Origin Responses – 2006

REGION	Top Responses						
	English	Scottish	German	Canadian	Ukrainian	North American Indian	French
